SUPPLEMENTARY INFORMATION:

I. Background
FDA plays a critical role in promoting public health by, among other things, ensuring that food labeling provides consumers with reliable, evidence-based information so that they can make informed choices about the foods they purchase in order to maintain and improve their health through diet and nutrition. On January 11, 2018, FDA released its 2018 Strategic Policy Roadmap (https://www.fda.gov/AboutFDA/ReportsManualsForms/Reports/ucm591993.htm), which focuses, in part, on efforts to empower consumers to make better and more informed decisions about their diets and health, foster the development of healthier food options, and expand the opportunities to use nutrition to reduce morbidity and mortality due to chronic disease. The roadmap highlights FDA’s commitment to finding approaches to advance policies that better achieve these goals.

On March 29, 2018, FDA Commissioner Dr. Scott Gottlieb, M.D. announced a comprehensive, multi-year FDA Nutrition Innovation Strategy (hereinafter the “FDA Nutrition Innovation Strategy”) (to access the speech, visit https://www.fda.gov/NewsEvents/Speeches/ucm603057.htm). The Nutrition Innovation Strategy seeks to promote public health through improved nutrition, encourage industry innovation to create healthy products that consumers seek, and address ways for consumers to identify those products. In implementing the Nutrition Innovation Strategy, FDA is committed to providing opportunities for public input to help with these initiatives. Early and active engagement from stakeholders and the public will help to inform FDA’s thinking and policy actions.

II. Topics for Discussion at the Public Meeting

FDA will host a 1-day meeting to provide stakeholders and other interested persons an opportunity to have an in-depth discussion on various aspects of the FDA Nutrition Innovation
Strategy and to provide input on ways to modernize FDA’s approach to better protect public health while removing barriers to industry innovation. FDA expects that the topics addressed at the meeting will include the following (a more detailed agenda will be made available prior to the meeting):

- Considering using a standard icon to denote the claim “healthy” on food labels.
- Creating a more efficient review strategy for evaluating qualified health claims on food labels.
- Discussing new or enhanced labeling statements or claims that could facilitate innovation to produce more healthful foods and more healthful consumer food choices.
- Modernizing the standards of identity to provide more flexibility for the development of healthier products, while making sure consumers have accurate information about these food products.
- Providing opportunities to make ingredient information more helpful to consumers.
- FDA’s educational campaign for consumers about the updated Nutrition Facts Label.

We invite interested parties to provide information on the above and other topics related to the FDA Nutrition Innovation Strategy.
