SUPPLEMENTARY INFORMATION:

I. Background
FDA is announcing the availability of a draft guidance for industry entitled “Verification Systems Under the Drug Supply Chain Security Act for Certain Prescription Drugs.” The DSCSA (Title II of Pub. L. 113-54) was signed into law on November 27, 2013. Section 202 of the DSCSA added section 582 to the FD&C Act (21 U.S.C. 360eee-1), which established the requirement that trading partners have systems in place to enable them to comply with certain verification obligations.

The draft guidance provides recommendations for robust verification systems for the determination, quarantine, and investigation of suspect products as well as quarantine and disposition of illegitimate products. As explained in the draft guidance, verification systems may include existing standard operating procedures or other processes or procedures provided that the verification systems ensure that the trading partner meets its obligations under section 582 of the FD&C Act. This draft guidance also addresses the manner in which FDA recommends that trading partners submit cleared product notifications (i.e., notifications that a suspect product is not an illegitimate product). Finally, the draft guidance also addresses the statutory requirements for verification, including verification of saleable returns, at the package level for product identifiers on packages and homogenous cases intended to be introduced in a transaction into commerce. While DSCSA also requires trading partners to notify the Agency of illegitimate products or products with high risk of illegitimacy, this requirement was previously discussed in a separate guidance document, and is therefore not addressed in this draft guidance.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the Agency’s current thinking on verification systems for certain human, finished, prescription drugs under section 582 of the FD&C Act. It does not establish any rights for any person and is not binding
on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This draft guidance is not subject to Executive Order 12866.

II. Paperwork Reduction Act of 1995

This draft guidance includes information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520) (PRA). In accordance with the PRA, prior to publication of any final guidance document, FDA intends to solicit public comment and obtain OMB approval for any information collections recommended in this guidance that are new or that would represent material modifications to those previously approved collections of information found in FDA regulations or guidance.
