**SUPPLEMENTARY INFORMATION:**

Background

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure fair practices in the food trade.

The Codex Committee on Contaminants in Foods (CCCF) is responsible for

- (a) Establishing or endorsing permitted maximum levels and where necessary, revising existing guideline levels, for contaminants and naturally occurring toxicants in food and feed;

- (b) Preparing priority lists of contaminants and naturally occurring toxicants for risk assessment by the joint FAO/WHO Expert Committee on Food Additives (JEFCA).
- (c) Considering and elaborating methods of analysis and sampling for the determination of contaminants and naturally occurring toxicants in food and feed;
- (d) Considering and elaborating standards or codes of practice for related subjects; and
- (e) Considering other matters assigned to it by the Codex Alimentarius Commission in relation to contaminants and naturally occurring toxicants in food and feed.

The Committee is chaired by the Netherlands.
