**SUPPLEMENTARY INFORMATION:**

Background

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and

implementation by governments, Codex seeks to protect the health of consumers and ensure fair practices in the food trade.

The CCMAS is responsible for defining criteria appropriate to Codex Methods of Analysis and Sampling; serving as a coordinating body for Codex with other international groups working in methods of analysis and sampling and quality assurance systems for laboratories; specifying, on the basis of final recommendations submitted to it by other bodies, reference methods of analysis and sampling, appropriate to Codex standards which are generally applicable to a number of foods; considering, amending, and endorsing, as appropriate, methods of analysis and sampling proposed by Codex (Commodity) Committees, (except that methods of analysis and sampling for residues of pesticides or veterinary drugs in food, the assessment of micro-biological quality and safety in food, and the assessment of specifications for food additives, do not fall within the terms of reference of this Committee); elaborating sampling plans and procedures; considering specific sampling and analysis problems submitted to it by the Commission or any of its committees; and defining procedures, protocols, guidelines, or related texts for the assessment of food laboratory proficiency, as well as quality assurance systems for laboratories.

The CCMAS is hosted by Hungary, and the meeting is attended by the United States as a member country of the Codex Alimentarius.
