#### *History and description of the remains*

In 1979, human remains representing, at minimum, seven individuals were removed from the Linton Street site (20SA510) in Saginaw County, MI. The human remains were discovered by workers doing routine maintenance on a gas line. An archeologist from the Saginaw Archaeological Commission removed the exposed remains. A sketch map of the site area and a newspaper article describing the circumstances of the discovery are the only known documentation of the recovery. The fragmentary human remains are determined to be Native American based on the presence of red ochre staining on some of the human remains and, in one case, dental morphology. No known individuals were identified. No associated funerary objects are present.

#### *Determinations made by the Historical Society of Saginaw County, Inc.*
