Abstract: The New Source Performance Standards (NSPS) for the regulations published at 40 CFR Part 60, Subpart K were proposed on June 11, 1973, and promulgated on March 8, 1974. These regulations apply to existing facilities and new facilities that store petroleum liquids in storage vessels with a storage capacity greater than 151,416 liters (40,000 gallons), including: storage vessels with capacity greater than 151,416 liters (40,000 gallons), but not exceeding 246,052 liters (65,000 gallons). New facilities include those that commenced construction, modification after the date of proposal. This information is being collected to assure compliance with 40 CFR Part 60, Subpart K.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None

Respondents/affected entities: Refineries.

Respondent's obligation to respond: Mandatory

Estimated number of respondents: 69 (total).

Frequency of response: Initially and occasionally.

Total estimated burden: 321 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$36,500 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the burden in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. There is an adjustment increase in labor costs; the increase is due to updated labor rates, which increases the hourly labor cost. There are no capital or operating and maintenance costs associated with this rule.

Courtney Kerwin,

Director,

Regulatory Support Division.
