Abstract: EPA regulations at 40 CFR part 80 set standards for certain parameters of gasoline and diesel fuel, such as sulfur content, to control harmful vehicle emissions and protect emission controls. Refiners and importers are required to test for these parameters and report the results to EPA. The regulations at 40 CFR part 80.47, 80.584, and 80.585 (1) identify acceptable test methods for some of the regulated parameters, (2) specify criteria for precision, accuracy, and quality control for the test methods used to measure the regulated parameters (certain test methods in use prior to October 28, 2013 are exempt from some of the criteria), and (3) establish procedures by which a test laboratory can demonstrate that an alternative test method meets the criteria and is thus “qualified” for use. This program for the qualification of test methods is
known as the Performance-Based Measurement System (PBMS). Test laboratories are required to generate certain records to demonstrate compliance with PBMS program requirements. This ICR covers the recordkeeping and reporting requirements for PBMS records. There are no required forms. Example formats for certain records are at: https://www.epa.gov/fuels-registration-reporting-and-compliance-help/compliance-performance-based-measurement-system.

*Form Numbers:* None.

*Respondents/affected entities:* Laboratories that test gasoline and diesel fuel.

*Respondent’s obligation to respond:* Mandatory.

*Estimated number of respondents:* 1,015 (total).

*Frequency of response:* On occasion, periodically (varies with test method).

*Total estimated burden:* 26,696 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* $2,460,454 (per year), includes $0 annualized capital or operation & maintenance costs.

*Changes in Estimates:* There is an increase of 17,198 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to an incorrect estimate of 52 laboratories for the current approval while the actual number should have been near 1,000.
