SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Instructions for Use--Patient Labeling for Human Prescription Drug and Biological Products and Drug-Device and Biologic-Device Combination Products--Content and Format." The recommendations in this guidance are intended to help develop consistent content and format across IFUs and to help ensure that patients receive clear, concise information that is easily understood for the safe and effective use of such prescription drug products.

The IFU is a form of prescription drug labeling submitted under a new drug application (NDA), biologics license application (BLA), or abbreviated new drug application (ANDA). The IFU is developed by applicants for patients who use drug products that have complicated or detailed patient-use instructions. For example, an IFU may be appropriate for a drug product with one set of dosing instructions for adult patients and another set for pediatric patients. The IFU is developed by the applicant, reviewed and approved by FDA, and provided to patients when the drug product is dispensed.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on "Instructions for Use--Patient Labeling for Human Prescription Drug and Biological Products and Drug-Device and Biologic-Device Combination Products--Content and Format." It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.
II. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The collections of information in 21 CFR part 201 have been approved under OMB control number 0910-0572; the collections of information in 21 CFR part 314 have been approved under OMB control number 0910-0001; and the collections of information in 21 CFR part 601 have been approved under OMB control number 0910-0338.
