[Docket No. 180117042-8884-02]

RIN 0648-XT013

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure of the General category June through August fishery for 2019.

SUMMARY: NMFS closes the General category fishery for large medium and giant (*i.e.*, measuring 73 inches curved fork length or greater) Atlantic bluefin tuna (BFT) for the June through August subquota time period until the General category reopens on September 1, 2019.

The intent of this closure is to prevent overharvest of the June through August subquota.

DATES: Effective 11:30 p.m., local time, August 9, 2019, through August 31, 2019.

FOR FURTHER INFORMATION CONTACT: Brad McHale, 978-281-9260, or Larry Redd, 301-420-8503.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*)

governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) among the various domestic fishing categories, per the allocations established in the 2006 Consolidated Highly Migratory Species Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006) and amendments.

NMFS is required, under § 635.28(a)(1), to file a closure notice with the Office of the Federal Register for publication when a BFT quota (or subquota) is reached or is projected to be reached. On and after the effective date and time of such notification, for the remainder of the fishing year or for a specified period as indicated in the notification, retaining, possessing, or landing BFT under that quota category is prohibited until the opening of the subsequent quota period or until such date as specified in the notice.

The 2019 base quota for the General category is 555.7 mt. See § 635.27(a). Each of the General category time periods (January, June through August, September, October through November, and December) is allocated a subquota or portion of the annual General category quota. The baseline subquotas for each time period are as follows: 29.5 mt for January; 277.9 mt for June through August; 147.3 mt for September; 72.2 mt for October through November; and 28.9 mt for December. We previously adjusted the January subquota upwards to 100 mt through three inseason quota transfers (83 FR 67140, December 28, 2018; 84 FR 3724, February 13, 2019; and 84 FR 6701, February 28, 2019) (although it is called the “January” subquota, the

regulations currently allow landings to continue until the subquota is reached, or until March 31, whichever comes first).

Based on the best available landings information for the General category BFT fishery, NMFS has determined that the June through August subquota of 277.9 mt is projected to be reached soon. As of August 6, reported landings total approximately 246 mt, and average catch rates are approximately 9.4 mt/day. Therefore the General category fishery should be closed to avoid exceeding the subquota. This action applies to Atlantic tunas General category (commercial) permitted vessels and HMS Charter/Headboat category permitted vessels with a commercial sale endorsement when fishing commercially for BFT and is taken consistent with the regulations at § 635.28(a)(1). Retaining, possessing, or landing large medium or giant BFT by persons aboard vessels permitted in the Atlantic tunas General category and HMS Charter/Headboat category (while fishing commercially) must cease at 11:30 p.m. local time on August 9, 2019. The General category will reopen automatically on September 1, 2019, for the September 2019 subperiod. The intent of this closure is to prevent overharvest of the June through August subquota.

Fishermen may catch and release (or tag and release) BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs at § 635.26. All BFT that are released must be handled in a manner that will maximize their survival, and without removing the fish from the water, consistent with requirements at § 635.21(a)(1). For additional information on safe handling, see the “Careful Catch and Release” brochure available at

<https://www.fisheries.noaa.gov/resource/outreach-and-education/careful-catch-and-release-brochure/>.

Monitoring and Reporting

NMFS will continue to monitor the BFT fisheries closely. Dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS' ability to timely implement actions such as quota and retention limit adjustment, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General and HMS Charter/Headboat category vessel owners are required to report the catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing *hmspermits.noaa.gov*, using the HMS Catch Reporting app, or calling (888) 872-8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional adjustments are necessary to ensure available subquotas are not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas. If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may call the Atlantic Tunas Information Line at (978) 281-9260, or access *hmspermits.noaa.gov*, for updates on quota monitoring and inseason adjustments.

Classification

The Assistant Administrator for NMFS (AA) finds that it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on, this

action for the following reasons:

The regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments and fishery closures to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. These fisheries are currently underway, and delaying this action would be contrary to the public interest as it could result in BFT landings exceeding the June through August subquota, which could result in the need to reduce quota for the General category later in the year and thus could affect later fishing opportunities. Therefore, the AA finds good cause under 5 U.S.C. § 553(b)(B) to waive prior notice and the opportunity for public comment. For all of the above reasons, there is good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effectiveness.

This action is being taken under 50 CFR 635.28(a)(1) (BFT fishery closures), and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: August 8, 2019.

Jennifer M. Wallace,
Acting Director,
Office of Sustainable Fisheries,
National Marine Fisheries Service.
