SUPPLEMENTARY INFORMATION:

Public participation and request for comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden

on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection. The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. Consistent with the requirements of Executive Order 13771, Reducing Regulation and Controlling Regulatory Costs, and Executive Order 13777, Enforcing the Regulatory Reform Agenda, the Coast Guard is also requesting comments on the extent to which this request for information could be modified to reduce the burden on respondents. These comments will help OIRA determine whether to approve the ICR referred to in this notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, [USCG-2018-0498], and must be received by [INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER].

Previous Request for Comments

The Coast Guard published a 60-day notice (84 FR 5459, February 21, 2019) and a 30-day notice (84 FR 19097, May 3, 2019) requesting comments, as required by 44 U.S.C. 3506(c)(2). The 30-day notice elicited two comments which can be viewed at <https://www.regulations.gov> in the docket USCG-2018-0498. This request provides a second 30-day comment period to address the public comments that we received and to solicit comments on the changes we made to the information collection request in response to the comments.

The first commenter noted that there is a workgroup developing recommendations for improving recreational boating incident reporting and opening communication between the Coast Guard and all levels of enforcement. The commenter noted that the current form requires the owner of the vessel to fill out the form and submit it to the Coast Guard, but there is no efficient way for the states to require recreational boat owners who are unwilling or unable to submit the safety defect report to the Coast Guard.

The Coast Guard supports allowing additional entities to report safety defects, and proposes to change the name of the report from "Consumer Safety Defect Report" to "Recreational Boat Safety Defect Report". The respondents for this new form will expand from receiving information from consumers (boat owners) to receiving information from any source, including boat owners, law enforcement, marine investigators, boat manufacturers, and the public. We will change the "who is reporting" section of the form to include places for names, addresses, and contact info for a company or agency and add check boxes for these additional sources to identify themselves as on the report, such as owner, manufacturer, law enforcement officer, investigator, and other. We will also collect vessel type, hull material, propulsion type, engine drive type and fuel using the 33 CFR 173/174 terms for those categories.

The second commenter said that the reporting form should not have negative financial impacts on small business, service providers, or individuals and that someone should compensate these entities for their research. The commenter also noted that associated equipment can be dangerous to owners and operators. We agree that defective equipment is dangerous to vessel owners and operators. The purpose of submitting a safety defect report to the Coast Guard is so that the Coast Guard can look into the

accuracy of the report and advise manufacturers in repairing defects in their equipment before they become catastrophic defects. The Safety Defect Report is not intended to cause negative financial impact on those entities. Safety defect reporting advances our maritime safety missions by asking vessel operators, and other entities, to report any suspected safety defects to the Coast Guard. The commenter did not give any suggestions on how to improve the collection of information or the form. No changes to this collection have been made at this time as a result of the second comment

Information Collection Request
