Prospective Grant of an Exclusive Patent License for: Autologous Cell Graft of Manufactured Retinal Pigment Epithelium Cell(s) on a Biodegradable Support Scaffold Transplanted Sub-Retinally for Intra-Ocular Ophthalmic Treatment of Age-Related Macular Degeneration in Humans

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Eye Institute, an institute of the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an Exclusive Patent License to practice the inventions embodied in the Patents and Patent Applications listed in the Supplementary Information section of this notice to CellRay, LLC, (“CellRay”) located in New York, New York and its affiliates.

DATES: Only written comments and/or complete applications for a license which are received by the National Cancer Institute’s Technology Transfer Center on or before [INSERT DATE 15 DAYS FROM DATE OF PUBLICATION OF NOTICE IN THE FEDERAL REGISTER] will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, and comments relating to the contemplated an Exclusive Patent License should be directed to: Edward Fenn., Senior Technology Transfer Manager, NCI Technology Transfer Center, 9609 Medical Center Drive, RM 1E530 MSC 9702, Bethesda, MD 20892-9702 (for business mail), Rockville, MD 20850-9702; Telephone: (240)-276-5530; Facsimile: (240)-276-5504 E-mail: Tedd.Fenn@nih.gov.

SUPPLEMENTARY INFORMATION:

Intellectual Property

and all U.S. and foreign patent applications claiming priority to the aforementioned applications.
The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be limited to the United States for certain of the rights, or worldwide, and the field of use may be limited to the following:

“The development, production and commercialization of an autologous cell graft of manufactured Retinal Pigment Epithelium cell(s) on a biodegradable support scaffold transplanted sub-retinally for intra-ocular ophthalmic treatment of age-related macular degeneration in humans”.

The technologies relate to development of compositions, devices and processes for production and delivery of RPE-containing tissue graft therapies for treating age-related macular degeneration in humans.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR Part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR Part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a completed license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information in these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 USC 552.

Dated: October 24, 2019.

Richard U. Rodriguez,

Associate Director,

Technology Transfer Center,

National Cancer Institute.
