Needs and Uses: The Federal Communications Commission (“Commission”) is requesting an extension of the information collection titled, “28 GHz Band” under OMB Control No. 3060-0768 from the Office of Management and Budget (OMB).

The information collection requirements contained in this collection require are as follows: (1) Local Multipoint Distribution Systems (LMDS) licensees to serve copies of their applications on all Non-Geostationary Mobile Satellite Service (NGSO/MSS) applicants (Section 101.147) and (2) NGSO/MSS feeder link earth stations must specify a set of geographic coordinates for location of these earth stations, 15 days after the release of a public notice announcing commencement of LMDS auctions (Section 101.147).

The frequency of filing is, in general, determined by the applicant or licensees. If this information is compiled less frequently or not filed in conjunction with our rules, applicants and licensees will not obtain the authorization necessary to provide telecommunications services. Furthermore, the Commission would not be able to carry out its mandate as required by statute and applicants and licensees would not be able to provide service effectively.
