[Docket No. CP20-32-000]

Notice of Request under Blanket Authorization; Gulf South Pipeline Company, LP

Take notice that on December 20, 2019, Gulf South Pipeline Company, LP (Gulf South), 9 Greenway Plaza, Suite 2800, Houston, Texas 77046, filed a prior notice application pursuant to sections 157.205(b), 157.208(c), 157.210, and 157.216 of the Federal Energy Regulatory Commission’s (Commission) regulations under the Natural Gas Act (NGA), and Gulf South’s blanket certificate issued in Docket No. CP82-43-000. Gulf South requests authorization to improve the efficiency and reliability of its McComb Compressor Station located on Gulf South’s Index 130 mainline in Walthall County, Mississippi, all as more fully set forth in the application, which is open to the public for inspection. The filing may also be viewed on the web at http://www.ferc.gov using the “eLibrary” link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call toll-free, (866) 208-3676 or TTY, (202) 502-8659.

Specifically, Gulf South proposes to (1) retire in-place one of the seven existing reciprocating compressor units (Unit 3) at the station, as it has suffered mechanical damage; (2) install one new Solar Taurus 70-T10802S Centrifugal Compressor (T70) package, including its required ancillary, auxiliary equipment and yard and station piping; and (3) place three of the six remaining reciprocating compressor units on standby.

Gulf South states, that only three existing reciprocating gas compressors are operated with the T70 during the station’s full load capacity, all located in Walthall County, Mississippi. The proposed modifications will result in an increase of certificated capacity of 48,000 dekatherms per day (Dth/d) from Harrisville receipts on Index 130 to deliveries on Gulf South’s existing 24-inch Index 133 system. One primary improved point would be Gulf South’s Transco Walthall Interconnect in south Mississippi.
