SUPPLEMENTARY INFORMATION:

I. E-Rulemaking

In accordance with the Privacy Act of 1974, the Department of the Treasury ("Treasury") proposes to establish a new system of records titled, “Department of the Treasury - .018 E-Rulemaking System of Records.”

Treasury collects comments on rulemakings and other regulatory actions, which it timely publishes on a Web site to provide transparency in the informal rulemaking process under the Administrative Procedure Act ("APA"), 5 U.S.C. 553. The Treasury also may solicit comments or other input from the public that may not be associated with statutory or regulatory notice and comment requirements.

During an informal rulemaking or other statutory or regulatory notice and comment process, Department personnel may manually remove a comment from posting
if the commenter withdraws his or her comments before the comment period has closed or because the comment contains obscenities or other material deemed inappropriate for publication by the Treasury. However, comments that are removed from posting will be retained by the Department for consideration, if appropriate under the APA.

Below is the description of the new Treasury - .018 E-Rulemaking System of Records.

Treasury has provided a report of this system of records to the Committee on Oversight and Government Reform of the House of Representatives, the Committee on Homeland Security and Governmental Affairs of the Senate, and OMB, pursuant to 5 U.S.C. 552a(r) and OMB Circular A-108, “Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act,” dated December 23, 2016.

II. The Privacy Act

Under the Privacy Act of 1974, 5 U.S.C. 552a, a “system of records” is defined as any group of records under the control of a federal government agency from which information about individuals is retrieved by name or other personal identifier. The Privacy Act establishes the means by which government agencies must collect, maintain, and use personally identifiable information associated with an individual in a government system of records.

Each government agency is required to publish in the Federal Register a notice of a new system of records in which the agency identifies and describes the system of records, the reasons why the agency uses the personally identifying information therein, the routine uses for which the agency will disclose such information outside the agency,
and how individuals may exercise their rights under the Privacy Act to determine if the system contains information about them.

Ryan Law,
Deputy Assistant Secretary for Privacy, Transparency, and Records.

**ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:**

Records in this system are safeguarded in accordance with applicable rules and policies, including all applicable Treasury automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances.

Entrance to data centers and support organization offices is restricted to those employees whose work requires them to be there for the system to operate. Identification (ID) cards are verified to ensure that only authorized personnel are present. Disclosure of information through remote terminals is restricted through the use of passwords and sign-on protocols which are periodically changed. Reports produced from the remote printers are in the custody of personnel and financial management officers and are subject to the same privacy controls as other documents of similar sensitivity. Access is limited to authorized employees. Paper records are maintained in locked safes and/or file cabinets. Electronic records are password-protected. During non-work hours, records are stored in locked safes and/or cabinets in a locked room.
Protection and control of any sensitive but unclassified (SBU) records are in accordance with TD P 71-10, Department of the Treasury Security Manual. Access to the records is available only to employees responsible for the management of the system and/or employees of program offices who have a need for such information.

The GSA information technology system that hosts regulations.gov and FDMS is in a facility protected by physical walls, security guards, and requiring identification badges. Rooms housing the information technology system infrastructure are locked, as are the individual server racks. All security controls are reviewed on a periodic basis by external assessors. The controls themselves include measures for access control, security awareness training, audits, configuration management, contingency planning, incident response, and maintenance.

Records in FDMS are maintained in a secure, password protected electronic system that utilizes security hardware and software to include multiple firewalls, active intrusion detection, encryption, identification and authentication of users.

Partner agencies manage their own access to FDMS through their designated partner agency account managers. Each designated partner agency account manager has access to FDMS. This level of access enables them to establish, manage, and terminate user accounts limited to their own agency.
