DATES: Applicable [INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER].

SUPPLEMENTARY INFORMATION:

Background

The review covers PT Anugerah Kertas Utama, PT Riau Andalan Kertas, APRIL Fine Paper Macao Offshore Limited, PT Asia Pacific Rayon, PT Sateri Viscose International, A P

On November 8, 2019, Commerce published the preliminary results of this administrative review in the Federal Register. Although we invited interested parties to comment on the Preliminary Results, we received no comments. Accordingly, no decision memorandum accompanies this Federal Register notice.

Scope of the Order

The merchandise under review includes uncoated paper in sheet form; weighing at least 40 grams per square meter but not more than 150 grams per square meter; that either is a white paper with a GE brightness level of 85 or higher or is a colored paper; whether or not surface-decorated, printed (except as described below), embossed, perforated, or punched; irrespective of the smoothness of the surface; and irrespective of dimensions (Certain Uncoated Paper).

Certain Uncoated Paper includes (a) uncoated free sheet paper that meets this scope definition; (b) uncoated ground wood paper produced from bleached chemi-thermo-mechanical pulp (BCTMP) that meets this scope definition; and (c) any other uncoated paper that meets this scope definition regardless of the type of pulp used to produce the paper.

Specifically excluded from the scope are: (1) paper printed with final content of printed text or graphics and (2) lined paper products, typically school supplies, composed of paper that

5. One of the key measurements of any grade of paper is brightness. Generally speaking, the brighter the paper the better the contrast between the paper and the ink. Brightness is measured using a GE Reflectance Scale, which measures the reflection of light off a grade of paper. One is the lowest reflection, or what would be given to a totally black grade, and 100 is the brightest measured grade. “Colored paper” as used in this scope definition means a paper with a hue other than white that reflects one of the primary colors of magenta, yellow, and cyan (red, yellow, and blue) or a combination of such primary colors.
incorporates straight horizontal and/or vertical lines that would make the paper unsuitable for copying or printing purposes. For purposes of this scope definition, paper shall be considered “printed with final content” where at least one side of the sheet has printed text and/or graphics that cover at least five percent of the surface area of the entire sheet.

On September 1, 2017, Commerce determined that that imports of uncoated paper with a GE brightness of 83 +/- 1% (83 Bright paper), otherwise meeting the description of in-scope merchandise, constitute merchandise “altered in form or appearance in minor respects” from in-scope merchandise that are subject to this order.\(^6\)

Imports of the subject merchandise are provided for under Harmonized Tariff Schedule of the United States (HTSUS) categories 4802.56.1000, 4802.56.2000, 4802.56.3000, 4802.56.4000, 4802.56.6000, 4802.56.7020, 4802.56.7040, 4802.57.1000, 4802.57.2000, 4802.57.3000, and 4802.57.4000. While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the order is dispositive.
