Pacific Island Fisheries; Western Pacific Stock Assessment Review; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: NMFS and the Western Pacific Fishery Management Council (Council) will convene a Western Pacific Stock Assessment Review (WPSAR) of a 2020 benchmark stock assessment for Hawaii gray jobfish (uku).

DATES: See SUPPLEMENTARY INFORMATION for meeting dates and times and daily agenda.

ADDRESSES: The meeting will be held at the Council office, 1164 Bishop St., Suite 1400, Honolulu, HI 96813.

FOR FURTHER INFORMATION CONTACT: Michael Seki, Director, NMFS Pacific Islands Fisheries Science Center, tel (808) 725-5360, fax (808) 725-5360, email michael.seki@noaa.gov.

SUPPLEMENTARY INFORMATION: The NMFS Pacific Islands Fisheries Science Center (PIFSC) conducted a single-species benchmark stock assessment of the gray jobfish (uku, Aprion virescens) in the main Hawaiian Islands. PIFSC previously
conducted a stock assessment for uku in 2017 using a data-limited length-based approach. The 2020 benchmark assessment diverges significantly from the 2017 assessment in that it implements the first integrated assessment of a domestic stock in the U.S. Pacific Islands Region. The integrated assessment uses the Stock Synthesis (v. 3.30) framework to integrate catch per unit effort indices, size frequency, diver survey, and catch data into a single age-structured model. PIFSC used this integrated model to estimate biomass and stock status through time, and evaluated stock status against the maximum sustainable yield based reference points described in the Council’s Fishery Ecosystem Plan for the Hawaii Archipelago. The 2020 assessment provides projections to inform management setting of acceptable biological catch and annual catch limits for 2020-2026.
