**Agenda**

The Herring Advisory Panel will discuss goals and objectives and potential range of alternatives to consider in Framework 7, an action to protect spawning of Atlantic herring on Georges Bank. The panel will have an initial discussion of Framework 8, an action considering herring fishery specifications for FY 2021-23 and adjust measures in the Herring Fishery Management Plan that potentially inhibit the mackerel fishery from achieving optimum yield. The Advisory Panel will have an opportunity to provide input on the Council's five-year research priorities related to the herring resource and fishery. The Atlantic States Marine Fisheries Commission (ASMFC) will host a public hearing on Addendum III. Addendum III is considering revisions to the days out program and quota management system in the Atlantic Herring Interstate Fishery Management Plan to better manage the Area 1A (inshore Gulf of Maine) sub-annual catch limit (ACL) under low quota scenarios. Staff from ASMFC will provide a summary of the draft addendum and there will be an opportunity for public comments. Other business may be discussed as necessary.

Although non-emergency issues not contained on this agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency
