Abstract: This study will provide much needed evidence on strategies to support US students' development
of foundational reading skills, essential to later learning.

A third of US students fail to develop foundational reading skills by 4th grade that are necessary to succeed
academically. In addition, the achievement gap is growing as demonstrated by The Nation’s Report Card.
To address, the Every Student Succeeds Act (ESSA) promotes the use of evidence-based literacy
interventions. And, the Department of Education (ED) has made supporting educators with the knowledge,
skills, professional development, or materials necessary to improve reading instruction a key priority. The
Individuals with Disabilities Education Act (IDEA) similarly encourages high quality instruction along
with better identification of students needing extra support to prevent or mitigate student reading issues.

This study will provide much needed evidence by evaluating two professional development strategies for
bolstering core reading instruction and supplemental supports, guided by data, within a MTSS-R
framework. MTSS-R is a widely used framework for providing high-quality reading instruction for all
students, identifying students needing supplemental or more intensive supports, and providing these
additional supports for those who need it.
