- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

Forms DS-1843 and DS-1622 collect medical history, lab tests, and physical examinations for all individuals applying for overseas positions, including their eligible family members. Forms DS-1843 and DS-1622 are designed to collect sufficient and current medical information on the individual in order for a medical provider to make a medical clearance determination for initial appointment to an overseas assignment. They are also used to determine whether the individual or eligible family member will have appropriate medical and/or educational resources at a diplomatic mission/host country abroad to maintain the health and safety of the individual or family member. The forms were updated to include questions regarding employment agency information for non-foreign service agencies. Once the collection instruments have been approved, the DS-1843/1622 can be used by respondents employed by both foreign and non-foreign service

agencies, rendering the DS-6561 form redundant. As a result, the DS-6561 would be discontinued upon OMB approval of the revised DS-1843 and DS-1622 forms.

Methodology

The respondent will obtain the DS-1843 and DS1622 forms from their human resources representative or download the forms from a Department website. The respondent will complete and submit the forms offline.

Karl Field,

Director of Medical Clearances.
