Community Right-to-Know; Corrections to Toxics Release Inventory (TRI) Reporting Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is correcting existing regulatory language for the Toxics Release Inventory (TRI) Program. EPA is making corrections that update identifiers, formulas, and names for certain TRI-listed chemicals, and updating the text that identifies which chemicals the 0.1 percent *de minimis* concentration applies to in order to remedy a cross-reference to a no-longer-accurate Occupational Safety and Health Administration (OSHA) regulatory citation. These corrections maintain previous regulatory actions and do not alter existing reporting requirements or impact compliance burdens or costs.

DATES: This final rule is effective on [INSERT DATE OF PUBLICATION IN THE **FEDERAL REGISTER**].

- Federal facilities.

A more detailed description of the types of facilities covered by the NAICS codes subject to reporting under EPCRA section 313 can be found at: <https://www.epa.gov/toxics-release-inventory-tri-program/tri-covered-industry-sectors>. To determine whether your facility would be affected by this action, you should carefully examine the applicability criteria in part 372, subpart B, of title 40 of the Code of Federal Regulations (CFR). Federal facilities are required to

report under Executive Order 13834 (<https://www.govinfo.gov/content/pkg/FR-2018-05-22/pdf/2018-11101.pdf>) as explained in the Implementing Instructions from the Council on Environmental Quality (https://www.sustainability.gov/pdfs/eo13834_instructions.pdf). If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What action is the agency taking?

EPA is correcting existing regulatory language for the TRI Program. EPA is making (a) editorial corrections that update identifiers, formulas, and names for certain TRI-listed chemicals described in the CFR, and (b) updating the text to indicate for which chemicals the 0.1 percent *de minimis* concentration applies to remedy a cross-reference to a no-longer-accurate OSHA regulatory citation. This action does not change the regulatory requirements of the TRI Program. This action is a “housekeeping” rulemaking intended to correct inaccuracies in regulatory text.

C. What is the agency's authority for taking these actions?

EPA is taking these actions under sections 313(g)(1) and 328 of the Emergency Planning and Community Right-to-Know Act (EPCRA), 42 U.S.C. 11023(g)(1) and 11048. In general, EPCRA section 313 requires owners and operators of covered facilities in specified SIC codes that manufacture, process, or otherwise use listed toxic chemicals in amounts above specified threshold levels to report certain facility specific information about such chemicals, including the annual releases and other waste management quantities. EPCRA section 313(g)(1) requires EPA to publish a uniform toxic chemical release form for these reporting purposes, and it also prescribes, in general terms, the types of information that must be submitted on the form. Congress also granted EPA broad rulemaking authority to allow the Agency to fully implement the statute. EPCRA section 328 states that: “The Administrator may prescribe such regulations as

may be necessary to carry out this chapter.” 42 U.S.C. 11048.

II. Summary of Proposed Rule

In the proposed rule (84 FR 65739, November 29, 2019) (FRL-9995-92), EPA proposed corrections that updated identifiers, formulas, and names for certain TRI-listed chemicals described in the CFR. Specifically, EPA proposed to: (i) Remove chemical names for those chemicals that have been delisted or moved to other listings; (ii) Incorporate listings in 40 CFR 372.65(b) for chemicals that are listed in 40 CFR 372.65(a) but are not listed in 40 CFR 372.65(b); (iii) Correct inaccurate Chemical Abstracts Service Registry Numbers (CASRN); (iv) Correct errors in chemical category definitions; (v) Remedy other known errors in the CFR chemical lists; (vi) Remove leading zeros from CASRNs; (vii) Correct errors in the list of lower thresholds for chemicals of special concern; and (viii) Revise the list of chemical names to include only the TRI primary name and the EPA registry name (if different from the TRI primary name) as a synonym. In addition, EPA proposed to replace an existing outdated cross-referenced regulatory citation and modify the text of the *de minimis* exemption, without changing the substance of the exemption itself.

The proposed changes included removing ammonium nitrate (solution) (CASRN: 6484-52-2), ammonium sulfate (solution) (CASRN: 7783-20-2), and flumetralin (CASRN: 62924-70-3) from the chemical lists. EPA also proposed to remove methylenebis(phenylisocyanate) (MDI) (CASRN: 101-68-8) as an individually listed chemical because it is part of the diisocyanates category. EPA proposed to add two chemicals, toluene-2,4-diisocyanate (2,4-TDI) (CASRN: 584-84-9) and vinyl bromide (CASRN: 593-60-2), to the CASRN ordered list at 40 CFR 372.65(b), these two were missing from 40 CFR 372.65(b) but were included in the alphabetical ordered listing at 40 CFR 372.65(a). The proposed rule included corrections to the CASRNs for

phosphorus (yellow or white) and d-trans-allethrin as well as corrections to the category definitions for the cyanide compounds category and the polychlorinated alkanes category. EPA proposed to correct footnotes for 2,2-dibromo-3-nitrilopropionamide (DBNPA) (CASRN: 10222-01-2) and methyl mercaptan (74-93-1) which are on the list but not currently reportable. EPA proposed to fix the placement of the chemical structure for the polybrominated biphenyls (PBBs) category which appears out of place in the CFR. EPA proposed to remove leading zeros from the CASRNs for a number of listed chemicals. EPA proposed to fix errors in and simplify the table for lower thresholds for chemicals of special concern at 40 CFR 372.28(a)(2). EPA proposed to revise the EPCRA section 313 chemical list by including only the primary chemical name, even if it is a common trade name, and removing most secondary names (the only secondary names that would remain are the EPA registry names from EPA's Substance Registry Services (SRS)). The last proposed change was to update the text of the *de minimis* exemption at 40 CFR 372.38(a) to remove a regulatory citation that no longer exists. For details about these changes please consult the proposed rule (84 FR 65739, November 29, 2019) (FRL-9995-92).

III. What comments did EPA receive on the proposed rule?

EPA received no substantive comments.

IV. Summary of Final Rule

EPA made no substantive changes from what was included in the proposed rule, however, the final rule reflects the following corrections to what was proposed:

- In the proposed regulatory text, the polychlorinated alkanes definition included the formula as " $C_xH_{2x-y}+2Cl_y$," whereas in this final rule, the "+2" has been changed to a subscript. Also, in the polychlorinated alkanes definition in the proposed rule, one of the molecular formulas had a typo; specifically, " $C_{10}H_{19}C_{13}$ " has been corrected to read " $C_{10}H_{19}Cl_3$."

- In the proposed rule, two chemicals in the list of the chemicals included in the polycyclic aromatic compounds category, 1,6-dinitropyrene and 1,8-dinitropyrene, were missing the last digits in their CARSNs. In this final rule, those two chemicals have been corrected to read “42397-64-8” for 1,6-dinitropyrene and “42397-65-9” for 1,8-dinitropyrene.

- This final rule adds EPA registry names for the chemicals 1,4-bis(methylisocyanate)cyclohexane (CASRN 10347-54-3), benzo[a]phenanthrene (CASRN 218-01-9), benzo[j,k]fluorene (CASRN 206-44-0), benzo[r,s,t]pentaphene (CASRN 189-55-9), and dibenzo[a,h]anthracene (CASRN 53-70-3).

- This final rule corrects the name for 1,2,3,4,7,8-hexachlorodibenzofuran (CARN 70648-26-9) which was missing the “i” between the “d” and “b.”

- This final rule corrects some minor issues such as the removal of some extra spaces in some chemical names.

- This final rule leaves the note concerning the stay for methyl mercaptan where it is (at the bottom of 40 CFR 372.65), and does not add a footnote marker next to the listing of the chemical in 40 CFR 372.65(a) & (b).

VI. Statutory and Executive Order Reviews

Additional information about these statutes and Executive orders can be found at <http://www2.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011).

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is not expected to be an Executive Order 13771 (82 FR 9339) regulatory action because this action is not significant under Executive Order 12866.

C. Paperwork Reduction Act (PRA)

This action does not impose any new information collection burden. Facilities that are affected by this action are already required to report for the chemicals impacted by this action under EPCRA section 313 and section 6607 of the Pollution Prevention Act (PPA), 42 U.S.C. 13101 *et seq.* OMB has previously approved the information collection requirements contained in 40 CFR part 372 under the provisions of the PRA, 44 U.S.C. 3501 *et seq.*, and has assigned OMB control number 2025-0009 (EPA ICR No. 1363.21) for Form R and Form A.

Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the Federal Register or by other appropriate means, such as on the related collection instrument or form, if applicable. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

D. Regulatory Flexibility Act (RFA)

Pursuant to the RFA section 605(b), 5 U.S.C. 601 *et seq.*, I certify that this action will not have a significant economic impact on a substantial number of small entities. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden or otherwise has a positive economic effect on the small entities subject to the rule. This rule adds no new reporting requirements, and there will be no increase in respondent burden or costs. This rule will not impose any requirements on reporting entities, including small entities.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action will impose no enforceable duty on any state, local or tribal governments or the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). It will not have substantial direct effects on the states, on the relationship between the National Government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination with Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). This rule will not impose substantial direct compliance costs on Indian tribal governments. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children from Environmental Health Risks and Safety Risks.

EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5-501 of Executive Order 13045 has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

This action is not a “significant energy action” as defined in Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on the supply, distribution or use of energy.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards that would require Agency consideration under NTTAA section 12(d), 15 U.S.C. 272 note.

K. Executive Order 12898: Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations.

This action does not entail special considerations of environmental justice related issues as delineated by Executive Order 12898 (59 FR 7629, February 16, 1994), because it does not establish an environmental health or safety standard. This action involves corrections that do not change the reporting requirements or otherwise affect the level of protection provided to human health or the environment.

L. Congressional Review Act (CRA).

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major

rule” as defined by 5 U.S.C. 804(2).

3. In § 372.38, revise paragraph (a) to read as follows:

§ 372.38 Exemptions.

(a) *De minimis concentrations of a toxic chemical in a mixture.* (1) If a toxic chemical is present in a mixture of chemicals at a covered facility and the toxic chemical is in a concentration in the mixture which is below 1 percent of the mixture, or 0.1 percent of the mixture in the case of a toxic chemical which is a carcinogen, a person is not required to consider the quantity of the toxic chemical present in such mixture when determining whether an applicable threshold has been met under § 372.25 or determining the amount of release to be reported under § 372.30. For purposes of the exemption in this paragraph (a), the following sources establish a chemical as a carcinogen or potential carcinogen:

(i) National Toxicology Program (NTP), Annual Report on Carcinogens (latest edition);

(ii) International Agency for Research on Cancer (IARC) Monographs (latest editions);

or

(iii) 29 CFR part 1910, subpart Z, Toxic and Hazardous Substances, Occupational Safety and Health Administration.

(2) The exemption in this paragraph (a) applies whether the person received the mixture from another person, or the person produced the mixture, either by mixing the chemicals involved or by causing a chemical reaction which resulted in the creation of the toxic chemical in the mixture. However, this exemption applies only to the quantity of the toxic chemical present in the mixture. If the toxic chemical is also manufactured (including imported), processed, or otherwise used at the covered facility other than as part of the mixture or in a mixture at higher concentrations, in excess of an applicable threshold quantity set forth in § 372.25, the person is

required to report under § 372.30. This exemption does not apply to toxic chemicals listed in § 372.28, except for purposes of § 372.45(d)(1).
