(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 9,433 respondents will respond to this collection annually, and it will take each respondent approximately 2 hours to provide their responses.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 18, 866 hours, which is equal to 9,433 (# of responses) * 2 (# of responses per respondent) * 2 (total time in hours to respond to this IC).

(7) *An Explanation of the Change in Estimates:* The adjustment associated with this collection is a decrease in the number of respondents by 483 and a decrease in the total

burden hours by 8,950, since the last renewal in 2017. The recalculated burden hours for this collection corresponds with the fact that each respondent responds only once, and now take 2 hours, instead of 1 hour to complete their responses.
