As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) How might the agency minimize the burden of the collection of information on

those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. For § 250.282 - Post-Approval Requirements for the EP, DPP, and DOCD: While the information is submitted to BOEM, BSEE analyzes and evaluates the information and data collected under this section of subpart B to verify that an ongoing/completed OCS operation is/was conducted in compliance with established environmental standards placed on the activity.

For §§ 250.287-295 - Deepwater Operations Plan (DWOP): BSEE analyzes and evaluates the information and data collected under this section of subpart B to ensure that planned operations are safe; will not adversely affect the marine, coastal, or human

environment; and will conserve the resources of the OCS. We use the information to make an informed decision on whether to approve the proposed DWOPs, or whether modifications are necessary without the analysis and evaluation of the required information.
