Research would be conducted for several cetacean studies including toxicology, microplastics, acoustics, and behavioral ecology. Researchers would conduct vessel and unmanned aircraft system surveys for biological sampling (skin and blubber biopsy, exhaled air, feces, and sloughed skin), counts, passive acoustics, photo-ID, photograph/video, observations, photogrammetry, and thermal imaging. Cetaceans also may be incidentally

harassed during surveys when targeting another cetacean species or conspecifics. Samples collected on the high seas or in foreign territorial waters worldwide may be imported for study. Collected tissue samples also may be cultured for cell line development. Please see the application take tables for proposed take numbers by species.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.
