AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUPPLEMENTARY INFORMATION:
Background

On February 18, 2015, Commerce published in the Federal Register the AD and CVD orders on crystalline silicon photovoltaic products from China and the AD order on crystalline silicon photovoltaic products from Taiwan. On January 2, 2020, the ITC instituted and Commerce initiated the first sunset reviews of the Orders pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). Commerce conducted these sunset reviews on an expedited basis, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2) because it received timely and adequate notices of intent to participate in the sunset reviews and substantive responses from domestic interested parties, but no substantive responses from respondent interested parties. As a result of its reviews, Commerce determined, pursuant to sections 751(c)(1) and 752 (b) and (c) of the Act, that revocation of the Orders would likely lead to continuation or recurrence of a countervailable subsidy and dumping, as applicable. Commerce also notified the ITC of the magnitude of the subsidy rates and dumping margins likely to prevail should the Orders be revoked. On September 4, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the Orders would be likely to lead to
