SUPPLEMENTARY INFORMATION:
BACKGROUND: The Advisory Board was established under the Energy Employees Occupational Illness Compensation Program Act of 2000 to advise the President on a variety of policy and technical functions required to implement and effectively manage the new compensation program. Key functions of the Advisory Board include providing advice on the development of probability of causation guidelines that have been promulgated by the Department of Health and Human Services (HHS) as a final rule; advice on methods of dose reconstruction, which have also been promulgated by HHS as a final rule; advice on the scientific validity and quality of dose estimation and reconstruction efforts being performed for purposes of the compensation
program; and advice on petitions to add classes of workers to the Special Exposure Cohort (SEC).

In December 2000, the President delegated responsibility for funding, staffing, and operating the Advisory Board to HHS, which subsequently delegated this authority to CDC. NIOSH implements this responsibility for CDC. The charter was issued on August 3, 2001, renewed at appropriate intervals, and rechartered under Executive Order 13889 on March 22, 2020, and will terminate on March 22, 2022.

PURPOSE: The Advisory Board is charged with (a) providing advice to the Secretary, HHS, on the development of guidelines under Executive Order 13179; (b) providing advice to the Secretary, HHS, on the scientific validity and quality of dose reconstruction efforts performed for this program; and (c) upon request by the Secretary, HHS, advise the Secretary on whether there is a class of employees at any Department of Energy facility who were exposed to radiation but for whom it is not feasible to estimate their radiation dose, and on whether there is reasonable likelihood that such radiation doses may have endangered the health of members of this class. SDRR was established to aid the Advisory Board in carrying out its duty to advise the Secretary, HHS, on dose reconstruction.

MATTERS TO BE CONSIDERED: The agenda will include discussions on the following dose reconstruction program quality management
and assurance activities: Dose reconstruction cases under review from Set 28, possibly including cases involving, Oak Ridge Gaseous Diffusion Plant (K25), Y-12 Plant, and Savannah River Site (SRS) and potentially other Department of Energy and Atomic Weapons Employers facilities; Dose reconstruction cases under review from Set 25, possibly including cases involving, Hooker Electrochemical, Nuclear Metals Inc, West Valley Demonstration Project, Carborundum, Metals and Controls Corp and potentially other Department of Energy and Atomic Weapons Employers facilities; and Dose reconstruction cases under review from Set 27, possibly including cases involving, Oak Ridge Gaseous Diffusion Plant (K25), Paducah Gaseous Diffusion Plant, SRS and potentially other Department of Energy and Atomic Weapons Employers facilities.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign Federal Register notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit,
Office of the Chief Operating Officer,
Centers for Disease Control and Prevention.
