Office of the Secretary

[Docket ID DoD-2020-OS-0076]

Privacy Act of 1974; System of Records

AGENCY: Office of the Secretary of Defense (OSD), Department of Defense (DoD).

ACTION: Notice of a modified system of records.

SUMMARY: The OSD is modifying a system of records titled “National Language Service Corps (NLSC) Records,” DHRA 07. The NLSC system is a cost-effective solution to the tactical and strategic management of foreign language support needs within the U.S. military and civilian enterprise for operations, plans, and workforce requirements. It provides a surge capability from individuals who are generally unavailable to the Government by tapping into our nation’s population of skilled citizens who speak hundreds of languages critical to our nation’s needs.

Initially established as a pilot program maintaining a pool of linguists proficient in ten languages, NLSC has since expanded its capabilities to support over 414 languages and dialects and provide over 4,000 man-hours of support to federal agencies annually. To meet the increasing need for professionals with language skills, in 2018, the NLSC expanded the reach of linguist support from DoD organizations to all federal government agencies and is modifying the system to accommodate this growth.

DATES: This system of records modification is effective upon publication; however comments on the routine uses will be accepted on or before [INSERT 30 DAYS FROM DATE OF PUBLICATION IN THE FEDERAL REGISTER]. The routine uses are effective at the close of the comment period.

**SUPPLEMENTARY INFORMATION:** The NLSC is a federal program sponsored by the DoD through the Defense Language and National Security Education Office (DLNSEO). Designed to support federal agencies in times of national need, the NLSC provides and maintains a readily available civilian corps of 8,906 bi-lingual volunteers. The NLSC provides members with the opportunity to join an active community of culturally diverse individuals, utilize language development tools, and use their language skills on missions and mission deployments.

This modification will expand the categories of records in the system to include Social Security Numbers and other fields required to facilitate safe foreign travel. In addition,
modifications were made to all other sections of the SORN, with the exception of, “exemptions claimed,” to align with the latest SORN templates and guidance. The intended purpose of this modification is to accommodate NLSC growth, modify an outdated tool to support NLSC missions more effectively, and meet the requirements of Office of Management and Budget (OMB) Circular A-108.

The DoD notices for systems of records subject to the Privacy Act of 1974, as amended, have been published in the Federal Register and are available from the address in FOR FURTHER INFORMATION CONTACT or at the Defense Privacy, Civil Liberties, and Transparency Division website at https://dpclld.defense.gov.

Access to electronic records is limited to authorized personnel who have a DoD Common Access Card (CAC) and successfully completed the proper security training. Access to records is further restricted using multi-factor authentication, and PII is encrypted both at rest and when transmitted electronically.

The servers are housed in nondescript facilities which restrict access to individuals with a justified business reason. The facilities are guarded by entry gates, security guards, and supervisors who monitor officers and visitors via security cameras. When approved individuals are on site, they are given a badge that requires multi-factor authentication and limits access to pre-approved areas.

All NLSC personnel are certified for their roles in accordance with DoD Directive 8570.01-M. A cyber awareness-training program is implemented to ensure that upon arrival,
and at least annually thereafter, all NLSC personnel receive DoD Cyber Awareness training. Additionally, cyber security personnel receive training to perform their assigned cyber security responsibilities, to include familiarization with their prescribed roles in all cyber related plans such as incident response, mitigation of malicious code and suspicious communications, configuration management, and disaster recovery.
