Every year, more and more competitors are added to the market of companies that write essays for students, and more and more of these services occupy leading positions in the list of the best in their field. Today we have found the top five services, according to sites that evaluate the work of each company. So we decided to check their work too. Well, the Internet says that these are the top five companies:

- **99papers.com** - One of the most accessible services for students, which won the hearts of users.
- **essaybox.org** - A service that works exceptionally well, the main secret of which is qualified specialists.
- **essays.io** - is an essay writing company that provides many examples of essays, research papers, dissertations, and other academic papers.
- **bookwormlab.com** - The company's writers specialize in all types of work and offer a wide range of subjects that students study in college.
- **essayfactory.uk** - the best and most reliable service in Great Britain.

Let's get to know these companies better by reading the reviews of our experts who have placed an order on these sites.

99papers is a service to hire cheap essay writer

"I was assigned to review the site **99papers.com**. To begin with, I want to say that as a student I have already come across this web service. And I'll say for sure that these guys have been working for a long time, though it's hard for me to give an exact figure.

I have studied their website in detail. The first thing they focus on is customer safety. Everyone who orders an essay here is protected by a privacy policy that is publicly available in one of the tabs. It also has a strict money-back policy.

The quality of the papers here, as it was, remains excellent. I hired an essay writer online and did not find a single mistake in the essay, which I ordered supposedly three hours before the deadline. Speed and quality still continue to amaze me in a good way!

What's great is the Rewards Club, a loyalty program for customers to save more money on their next orders. As I expected, the 99papers cheap essay writer service check was successful."

Extra perks: Rewards Club loyalty program, short deadlines met

Features: high quality of papers, privacy and refund policy

EssayBox - professional essay writer service

"Over time, it becomes difficult to choose one single company for complex academic papers, because there are more and more of them on the market. However, let's take a look at the **essaybox**. These guys are verified by several companies, and therefore I was not afraid to be in the clutches of scammers. So I wrote to customer support.

I had a nice chat with the online support workers, they answered my questions, and I proceeded to place an order. Since this service is famous for its experts, I immediately chose the ENL writer function.

I received my essay two days later. I checked it for errors and typos, and also used an online copywriter's tool to find out if this text is original. The result pleasantly pleased me - 99 percent of uniqueness. I also really liked some of the turns of speech.

I strongly recommend using essaybox, as they are really professional in their approach to work, so hire a writer for the essay here."

Extra perks: you can hire an essay writer for free from those who are online, or entrust it to the site's algorithms

Features: original academic papers, friendly customer service workers.

Essays.io - custom essay writer service

"One order was enough for me to understand that this site is really good. You know, as it often happens - good work is always visible immediately. This is the same case!

This site is probably the best at marketing and selling its brand. They also can share the e-book with you that teaches you how to improve your writing skills.

Prices here are average but still affordable. The guys here work with any deadlines and give clients only high-quality papers. At least that's how it was for me. In case you don't like your academic papers, you can request a refund, or use the free revisions service.

There are many examples of different types of academic work here. You can read how local writers write and make sure that the academic papers here are good - I even checked the margins when I noticed the differences in different styles of design. Very responsible, I recommend"

Extra perks: a primer on improving writing skills, lots of sample essays, and other academic papers.

Features: affordable prices, nicely designed website, free revisions.

BookwormLab - essay writer online

"I liked this service for its professionalism and exceptional attitude towards the client and really reliable college essay writer. Here I saw that a good reputation and communication with the client are much more important here than an assembly line of badly done work. It seems that they offer only the best essay writer for your task.

Here, prices start at \$15, which is only available to those students who earn enough money to afford it. Looking ahead, the quality justifies the price entirely. When checking the essay, I did not find any errors, and all terms were appropriately included in the text. The topic of the material was revealed, and all the wishes that I indicated in the order form were met.

The site is designed in very pleasant colors. The interface gave me particular pleasure. I didn't even have to look for the order button because it's right on the main page of the site. The support service, respectively, answered me almost the same - I appreciated their politeness.

I was also satisfied with the privacy policy. It says here that no information about you is shared with third parties, which is also nice when working with any company."

Extra perks: 24/7 support, Transparent privacy policy

Features: the price corresponds to the quality, a large selection of subjects that students study in college

EssayFactory - hire essay writer from UK

Reviewed by - Gregory Mint

"If you love British English more than American English, as I do, or if your teacher requires you to use native British words, **EssayFactory** is truly the best UK service I have ever used.

It's no secret that British people can often be blunt and short-tempered at work, but here the support team is surprisingly very accommodating.

This service offers many free features that are available to every customer when ordering. The order form, by the way, is also very convenient and step-by-step. You do not need to enter all the requirements manually, because there are buttons there.

After I ordered an essay, I waited two days less than indicated when ordering. I started checking the documents, and I was satisfied. The speed and quality here are definitely at the highest level. And it is clear that the writers here are clearly educated and skillful. In general, in the UK, this service is apparently one of the best"

Extra perks: convenient and intuitive order form, top essay writers

Features: polite support service, high speed, and quality of academic papers

Conclusion

That's the whole review of the best services for writing essays and other academic papers. Always read the reviews of the company you want to order from if you don't want to be scammed. We recommend these companies because we are convinced of their quality. We wish you wonderful results in the exam session!
