What is Rollercoin

Rollercoin game is an online virtual Bitcoin mining game that allows players to get crypto skills, compete against friends in mining Bitcoins, and build an empire with real crypto rewards. Innovative game mechanics provide players with a perfect balance between entertainment and learning – getting rewards while playing games and having fun.

With its seamless browser-based gameplay, one of the oldest crypto games Rollercoin allows players to engage in the game across various devices without the need for downloads. The worldwide community of Rollercoin has grown rapidly since its inception in 2018, with a staggering 3.5 million players and 440,000 active community members. The platform's monthly player count of 1.5 million demonstrates its exceptional popularity and distinguishes it from other gaming platforms.

Players can build and develop their own mining data center, upgrade settings to enhance mining power and collect miners to boost their performance. The game features a global mining pool, where the power of each player is combined, and block rewards are distributed based on individual mining power, emulating the dynamics of real-world crypto mining.

Moreover, the game offers multi-mining opportunities for various cryptos, including BTC, ETH, DOGE, MATIC, BNB, Sol, TRON, Shiba, BUSD, USDT, and LTC. Also, Rollercoin provides instant withdrawals.

Rollercoin offers a diverse range of addictive mini-games. These games provide an enjoyable experience while earning additional mining power. By completing Daily and Weekly Quests and easy tasks, players are getting opportunities to receive more rewards and learn about crypto mining.

Adding to its attractive features, Rollercoin also offers a referral program. Players can invite their friends to join the Rollercoin universe and, in turn, get a percentage of their in-game earnings: **25% from referrals'** profit and 15% from in-game purchases.
