

Centre for Neuro Skills Sets June 24 as Grand Opening for New Austin, Texas Clinic

New Facility Designed to Deliver Advanced Care to Brain Injury Patients

NEWS RELEASE BY CENTRE FOR NEURO SKILLS

Bakersfield, Calif. | June 10, 2021 10:42 AM Pacific Daylight Time

The **Texas Brain Injury Alliance** reports that 144,000 Texans sustain a traumatic brain injury each year - one every 4 minutes. The **Texas Department of State Health Services** reports that approximately 72,500 Texas residents have strokes each year that require hospitalization. Now, more help is on the way.

Centre for Neuro Skills (CNS), a premier provider of treatment for traumatic and acquired brain injury, announced the grand opening date of its new clinic in Austin, Texas. The clinic will celebrate with an invitation-only open house on Thursday, June 24. Former CNS patients Justin Glick and Megan Guerra are guest speakers who will share their rehabilitation stories. The 17,000-square-foot facility is located at 14425 Falconhead Blvd., Building F, Suite 200, Austin. A virtual tour of the new facilities is available. To access the tour, please click [here](#).

Centre for Neuro Skills - Austin Clinic

The Austin clinic is CNS' fourth location in Texas, joining Dallas, Fort Worth and Houston. CNS also treats patients at three facilities in California. All CNS clinics offer a continuum of care approach to therapeutic rehabilitation and disease management services for those recovering from acquired and traumatic brain injuries.

"No two brain injuries are the same," said CNS' Chief Medical Officer, Dr. Matthew Ashley. "What sets CNS apart is our whole team focus on patients and their caregivers. This new clinic will allow us to provide localized quality care to brain injury patients in Austin and Central Texas, which will ensure better recovery. Our goal is to maximize independence and improve quality of life."

Patient Success Story – Justin Glick

Centre for Neuro Skills Caroline Glick, Justin Glick (former patient) and daughter Sienna

Former CNS patient **Justin Glick** and his wife Caroline relocated to Austin from Los Angeles in 2020. They have since had their first baby, Sienna. After sustaining a traumatic brain injury at work, Justin sought treatment at the CNS Los Angeles clinic. He made a remarkable turnaround in just 47 days. Justin had spent his career in a highly specialized profession – the collecting and selling of rare coins, jewelry and watches. He's now a real estate agent with Coldwell Banker in Austin.

According to Justin, “the Centre for Neuro Skills has an amazing team that helped me literally get back on my feet and back to work. Caroline and I moved to Austin last year and absolutely love it. And now, we have our friends from CNS as neighbors. Austin is fortunate to have such an outstanding resource for brain injury rehabilitation.”

Rehabilitative Technology

Technology and advanced care systems at the **Austin Clinic** include:

- The ZeroG® Gait and Balance System, which helps patients relearn to walk, sit, stand, balance and improve gait.
- The Bioness Integrated Therapy System, which addresses vision, safety and motor balance training; the system supports returning to work and driving.
- The Independent Living Scale tracking system, which monitors patient progress.
- Tablets to record/integrate patient data in real time for analysis.
- Patient web portal for 24/7 secure access.
- Dedicated physician space, including a medical exam room, secured medication room and a nursing suite.
- Dedicated area for behavior analysis, including a meditation/quiet room.
- Patient and staff kitchen; computer center and offices for case management and administration.

COVID-19 Safety

Staff, patients and visitors are required to wear a mask at all times when in the clinic and common areas of residential homes. Clinic and residential visitors will have their temperatures taken upon entry. CNS clinics, homes and facilities observe CDC guidelines.

About Centre for Neuro Skills

Centre for Neuro Skills is an experienced and respected world leader in providing intensive rehabilitation and medical programs for those recovering from all types of brain injury. CNS covers a full spectrum of advanced care from residential and assisted living to outpatient/day treatment. Founded by Dr. Mark Ashley in 1980, CNS has seven locations in California and Texas.
