

Comodo Announces BlueGrass Technologies as Partner for Middle East Cybersecurity Marketplace

NEWS RELEASE BY COMODO

Clifton, NJ | December 23, 2020 10:02 AM Eastern Standard Time

Comodo, the world's leader of next-generation cybersecurity announced a partnership with BluGrass Technologies. Together Comodo and BluGrass will bring Comodo's cybersecurity solutions, including the Dragon platform with advanced endpoint protection (AEP), SOC-as-a-Platform (SOCaaS™), Managed Detection and Response (MDR), mobile device management (MDM), Secure Internet Gateway (SIG), and Secure Email Gateway (SEG) to the Middle East marketplace.

"We needed a comprehensive cybersecurity and endpoint management solution—one that would enable our customers to protect and manage their endpoints, internet connections, email, network, and infrastructure, and also monitor the complete security operations through a SOC, with integrated SIEM—all from a single vendor," said Tony Alam, CEO of BluGrass Technologies. He continued, "We selected Comodo over other cybersecurity providers because it delivers a suite of protection that is both lightweight and scalable and provides a multi-layered defense. We can now offer customers one security solution for endpoints and infrastructure— both on-premises and in the cloud, with easy integrations, and at an affordable price."

Comodo's Dragon platform with AEP is a complete cloud-native framework that delivers a zero-trust architecture to protect and defend endpoints. Its patent-pending auto containment technology has active breach protection that neutralizes ransomware, malware, and cyber-attacks. The auto containment runs an unknown executable in a kernel API virtualized mode, thereby offering attack surface reduction (ASR) which neutralizes ransomware attacks. Comodo's Valkyrie is a file verdict system that analyzes and gives a trusted verdict for 100% of files on the network.

Tony said, "Comodo's Dragon platform with AEP provides a multi-layered defense that allows unfettered access to all known good files, denies access to any known malicious files, and automatically contains files found to be unknown. As a result, we are seeing much fewer security incidents."

Comodo's MDR is a 24/7 Security Operations Center delivered as a Service (SOCaaS). It provides a team of security researchers that extends a company's IT team to safeguard IT systems and infrastructure. Using Comodo SIEM and endpoint management technologies

along with threat intelligence from the Comodo Threat Lab, our security experts hunt for vulnerabilities, continuously monitoring IT systems for indications of compromise, and contain advanced threats.

Comodo's SOCaP is the world's first and only complete, next-gen SOC-as-a-platform offering, which includes people, process, and technology. It offers full white-label capability that makes it easy to add managed security services to a portfolio.

Alan Knepper, President and Chief Revenue Office at Comodo said, "This partnership empowers BluGrass Technologies to offer the only cybersecurity that stops undetectable threats to the Middle East marketplace. Their customers now have access to a comprehensive cybersecurity suite that neutralizes zero-day threats that AI, ML, and other technologies miss."

About BluGrass Technologies

Founded in 2016, BluGrass Technologies (BGT) is an IT managed services provider with a permanent presence in 5 Middle Eastern countries. BGT's mission is to address clients' concerns as regards to the business disruptions due to fast technology changes; fear of cyberattacks and scarcity of IT resources.

BGT "AIME" methodology is proven with many clients and the services are reinforced by proficient experts; quality of work; supreme products; visible cost-saving and upsurge in IT efficiency.

BGT offers a wide range of applications and infrastructure management services delivered by highly qualified consultants, project managers, and engineers. BGT is backed up by a channel network consisting of 50 technology partners, 60 skilled service providers, and access to over 200 IT resources; this strong network empowers BGT to serve its clients diligently; frequently beyond clients' expectations. About Comodo

Comodo is the world's leader of next-generation open source cybersecurity, with the industry's most disruptive innovations.

We help customers stop breaches with groundbreaking auto containment technology that neutralizes ransomware, malware and cyber-attacks. Our complete cloud-native framework delivers a zero-trust architecture with active breach protection for the most comprehensive defense against zero-day threats. Comodo's cybersecurity products maximize intelligent sharing between every component of the platform, therefore providing superior security. We are the only company that analyzes and gives a trusted verdict for 100% of files on a network.

Comodo leverages innovation to celebrate and support the cybersecurity community by offering the very first open source endpoint detection and response (EDR). We believe that an open source model using community-powered collaboration will ensure that every organization has access to the industry's most sophisticated EDR.

Headquartered in Clifton NJ, Comodo's global development team and threat intelligence laboratories deliver innovative, category leading, security solutions for thousands of companies' endpoints, network boundaries, and internal networks. For more information visit <https://www.comodo.com/>
