

Deep-South Resources announces soil sampling results from Luanshya West project in Zambia

NEWS RELEASE BY DEEP-SOUTH RESOURCES INC

Vancouver | June 01, 2023 02:12 PM Eastern Daylight Time

Deep-South Resources CEO Pierre Leveille joined Steve Darling from Proactive to share news about the mineral exploration company working in Zambia. The company has shared the first results from a soil sampling program at the Luanshya West project in Zambia.

Leveille telling Proactive multiple soil anomalies saw peak values of 332 parts per million (ppm) copper and 282ppm cobalt in leached soil regimes. Soil samples assay results for copper were determined to be: 332ppm, 286ppm, 272ppm, 253ppm and 247ppm and results for cobalt were determined to be: 282ppm, 179ppm, 174ppm and 159ppm, 151ppm. Leveille also told Proactive geological teams are currently proceeding with plans for a second phase of the soil sampling program before getting the drills turning in the fall.
