

Industrial Defender and Technomak Partner to Secure Critical Infrastructure in the Middle East

Organizations in the Middle East will benefit from Industrial Defender's comprehensive OT security and compliance platform as part of Technomak's award-winning engineering services.

NEWS RELEASE BY INDUSTRIAL DEFENDER

Foxborough, MA | March 03, 2021 02:22 AM Eastern Standard Time

Industrial Defender, an operational technology (OT) security pioneer, today announced a new partnership with Technomak, a global leader in industrial engineering, fabrication, and construction services, to deliver **security-by-design** for industrial control systems in the Middle East. Technomak will offer Industrial Defender's **Automation Systems Manager®** (ASM) as part of their industrial engineering projects to provide the highest level of cyber resilience possible for Middle Eastern critical infrastructure.

"Technomak's impressive engineering expertise and market knowledge combined with our powerful OT cybersecurity and compliance platform will greatly improve the cybersecurity posture of companies operating industrial control systems in the Middle East," said Jim Crowley, CEO of Industrial Defender.

"Industrial Defender's specialized and unique technology of safely collecting, monitoring, and managing OT security data would add another milestone in Technomak's overall offerings of turnkey delivery of Automation & Control Solutions to its customers. Technomak has been an industry leader in providing such solutions from design stage to the final testing & commissioning of these specialized systems. The OT cyber security offerings from Industrial Defender would give a complete protection from outside cyber threats to any critical infrastructure," said Mohammed Haneefa, Co-Founder and Group MD of Technomak.

About Industrial Defender

Since 2006, Industrial Defender has been solving the challenge of safely collecting, monitoring, and managing OT asset data at scale, while providing cross-functional teams with a unified view of security. Their specialized solution is tailored to complex industrial control system environments by engineers with decades of hands-on OT experience. Easy integrations into the broader security and enterprise ecosystem empower IT teams with the same visibility, access, and situational awareness that they're accustomed to on corporate networks. About Technomak

Technomak has been involved in some of the most renowned and critical industrial projects in the Middle East region for almost two decades. In addition to the company's prime focus into the Oil & Gas sector it also provides comprehensive solutions for each stage of a project life cycle into the Water, Power, Metals, Renewables, and Industrial sectors as well.

Technomak's offerings through its "Automation & Digital Solution" division helps industrial

businesses enhance process visibility, achieve reliable controls, and gain enhanced and optimized productivity. To operate efficiently, there is an ever increase demand for the convergence of Operation Technology and Information technology. At Technomak we bridge this gap and ensure a seamless integration between the OT and IT platforms and at the same time mitigate all security risks of a plant operation.
