

IT Partners Security Chooses Comodo Solutions Over All Other Cybersecurity Solutions to Stop Zero Day Threats

COMODO

NEWS RELEASE BY COMODO

Clifton, New Jersey | January 15, 2021 07:00 AM Eastern Standard Time

IT Partners Security, a distributor based in Poland that services the central and eastern European markets, has been featuring Comodo, the world's leader of next-generation cybersecurity to its customers, helping it become a market leader in its space.

"There are no other solutions on the market with functional capabilities like Comodo's. We believe that it cannot be compared with any other solutions." Said Kamila Bachowska, Marketing Manager.

"Previously, we did not have a solution that would have all the most important things for an IT specialist in one place. So we [became] interested in solutions from Comodo, which is exactly such a comprehensive solution. Antivirus protection management, remote desktop, procedures, WakeonLAN, MDM and many other tools simply facilitate the work of administrators", Kamila continues.

IT Partners Security Testimonial

IT Partners Security dropped a competitor's solution and chose Comodo's Dragon platform with Advanced Endpoint Protection (AEP), which is a complete cloud-native framework that delivers a zero-trust architecture to protect and defend endpoints. Its patent-pending auto containment technology has active breach protection that neutralizes ransomware, malware and cyber-attacks. The auto containment runs an unknown executable in a kernel API virtualized mode, thereby offering attack surface reduction (ASR) which neutralizes ransomware attacks. The Dragon Platform also utilizes a Default Deny security posture with Default Allow usability to provide a most comprehensive protection against zero-day threats, while having no impact on end-user experience or workflows.

"...We gave up our competitive solution and switched to Comodo solutions because we lacked effective protection with unknown executables. Thanks to Comodo's solutions, we can be sure that we will not be infected.... Comodo's solutions are constantly being updated and improved" Said Kamila.

Comodo's Valkyrie analyzes and gives a trusted verdict for every file – no other company will analyze and give trusted verdict for 100% of the files on a network. "Unlike other antivirus offerings, which have false positives, Comodo provides that extra level of

protection and prevents an unknown file from damaging anything on the system. Comodo is always there for my business, and their team is always available when we have questions or require technical assistance. They truly care about their partners.”

About IT Partners Security

IT Partners Security is a member of a group of IT companies. As a result, They have extensive experience in such areas as telecommunications, data center construction and management, it security, it outsourcing, development. It partners security is an experienced provider of network and computer systems security solutions. About Comodo

Comodo is the world’s leader of next-generation open source cybersecurity, with the industry’s most disruptive innovations.

We help customers stop breaches with groundbreaking auto containment technology that neutralizes ransomware, malware and cyber-attacks. Our complete cloud-native framework delivers a zero-trust architecture with active breach protection for the most

comprehensive defense against zero-day threats. Comodo's cybersecurity products maximize intelligent sharing between every component of the platform, therefore providing superior security. We are the only company that analyzes and gives a trusted verdict for 100% of files on a network.

Comodo leverages innovation to celebrate and support the cybersecurity community by offering the very first open source endpoint detection and response (EDR). We believe that an open source model using community-powered collaboration will ensure that every organization has access to the industry's most sophisticated EDR.

Headquartered in Clifton NJ, Comodo's global development team and threat intelligence laboratories deliver innovative, category leading, security solutions for thousands of companies' endpoints, network boundaries, and internal networks. For more information visit <https://www.comodo.com/>
