Letting Your Money Work For You? Current's Debit Card Rewards Program Could Be The Way To Go

NEWS RELEASE BY CURRENT

New York, NY | March 08, 2023 09:45 AM Eastern Standard Time

By Faith Ashmore, Benzinga

In the early 2000s, lots of banks offered a variety of rewards for debit cards - it was the status quo. However, the <u>federal government enacted the Durbin amendment of the Dodd-Frank Act in 2010</u> which effectively reduced the rewards for debit card use. While the amendment added more protection for consumers, debit card rewards decreased and many banks started restricting rewards to their credit card programs.

Today, credit cards are the primary provider of bonus features like travel rewards or miles, cashback deals, and retail perks. **A Bankrate survey in 2022** reported that cashback is the favorite feature among credit card users.

It is unsurprising that cashback is a prized feature. Cashback works by the bank offering a percentage of cash back on every qualifying purchase. For example, if a bank offers 1.5% cash back for every purchase at a restaurant, the user will earn 1.5 cents in cash back rewards for every dollar spent. This amounts to roughly \$15 for every \$1,000 spent.

While there are a few banks that still offer cash-back rewards to debit card users, they are few and far between. While approximately 83% of Americans own at least one credit card, only 51% of low-income individuals own a credit card. In comparison, 85% of high-income individuals own at least one credit card. The unfortunate side of credit cards is it can be hard to qualify with a low income and a low credit score, which means that people with higher incomes also have more access to the reward programs that are attached to credit cards.

<u>Current</u> is shifting this narrative and offering cash back rewards for their debit card. The company is a new type of banking alternative and many features are ideal for individuals looking to get some extra cashback in their wallets.

Current is built around the idea that people deserve financial flexibility and freedom in their everyday life.

How Does Current's Cash Back Program Work?

Current offers cash back rewards through their debit card and on their app. Users can earn up to 15x points at over 14,000 participating merchants nationwide. The points can then be redeemed

through the app for either cash or other items, whatever you prefer.

Another unique feature is the app shows all the current locations near you that qualify for cash back with the number of points awarded. Current's system is meant to be simple for people to use and earn money back.

The cash-back program looks to work well with Current's other features. The company offers direct deposits up to two days earlier than the scheduled pay date.¹ The mobile banking app also grants overdrafts up to \$200, pending approval, with no overdraft fees. There are no minimum balance fees either.² Current's app also allows for buying and selling crypto without trading fees, conveniently all in one place. For individuals who aren't looking to invest in a volatile market, Current offers savings pods with up to 4.00% APY.³

For those looking for a flexible banking option with features that help optimize their money, Current seems to be innovating in the financial world and might be a good option.
