

NickelSearch highlights upgrade to Carlingup nickel sulphide indicated resources

NEWS RELEASE BY NICKELSEARCH LTD

Melbourne, Victoria | March 30, 2023 05:40 PM Eastern Daylight Time

NickelSearch Ltd (ASX:NIS) MD Nicole Duncan discusses with Proactive a significant upgrade of nickel sulphide indicated resources at Carlingup Nickel Project in WA to 8.3 million tonnes at 0.52% nickel, 0.06% copper and 0.01% cobalt. This lift in confidence is a result of the success of infill drill programs last year. The MREs for RAV1, RAV4 and RAV4 West show that NIS can continue to add resources through expansion of shallow open pit resources and the discovery of new deposits.
