

# Patagonia Lithium seizes Argentina's lithium opportunity

NEWS RELEASE BY PATAGONIA LITHIUM LIMITED

## Melbourne, Victoria | June 02, 2023 03:00 PM Eastern Daylight Time

Patagonia Lithium Ltd (ASX:PL3) executive chairman Phil Thomas walks Proactive's Elisha Newell through high-grade lithium assays from the Formentera And Cilon Projects in Argentina. Samples returned up to 1,122 parts per million lithium and boast very low magnesium ratios, providing impetus for an 18-kilometre geophysics study to determine resistivity depth. Thomas also discusses a low resistivity unit that's taking shape along the Tomas III concession and outlines what's next for the company on its Argentinian lithium journey.
