

Premier Biomedical Inc. (OTC: BIEI), Welcomes Officers, Directors and Key Advisors

Premier's Graphene Production Will Be Spearheaded By Its Technical Staff Identified Below, mostly Interfacing with Biographene Technology

NEWS RELEASE BY PREMIER BIOMEDICAL INC

Imperial Valley, CA | March 30, 2023 09:00 AM Eastern Daylight Time

McapMediaWire -- Premier Biomedical Inc., now known as Premier Graphene, Inc. (OTC: **BIEI**), has relocated its headquarters to Imperial Valley, CA. CEO Ivan Mendez welcomes its new officers, directors, and other significant participants.

As Vice President, Noe Gallego will spearhead our Mexico hemp procurement operations. Mr. Gallego shared the following, "I am excited to be at the forefront of a rapidly growing industry, with a talented group of persons involved in Premier Graphene, Inc. (Premier). Premier is uniquely poised to revolutionize a variety of industrial sectors from health and wellness to aerospace and construction. With the aid of its counsel in Mexico, Premier Graphene Inc will permit low-cost and robust growing operations to supply high-quality hemp as the principal raw material component for producing the highest-quality graphene that is eco-friendly. Perhaps ironically, it will also inevitably be at a more accessible cost. Indeed, it will be particularly well-suited for Premier's wide range of products. Perhaps equally important, the environment in Mexico permits 3 Growth cycles per year for this type of industrial hemp, which is the highest quality and best-suited for high-grade graphene production."

Chief of Legal Operations in Mexico and Latin America, Ana Erika Santana, Esq., presently is assisting the federal government of Mexico to codify cannabis and hemp laws and to enact appropriate regulations consistent with such initiatives. Ms. Santana specializes in compliance within both the corporate and government sectors. Ms. Santana added, "To have a successful business, we must have full compliance and cooperation among governmental bodies. I will also ensure conformity with social responsibility which is particularly important within this sector. My strong connections with the Mexican government prompt my participation with Premier Graphene and create my optimism for its future."

Dr. George Stantchev, will serve as a scientific consultant to Premier. Dr. Stantchev is the owner of four European companies that have a presence in North America. The first

company, AEMC Technologies, is principally focused on thermal night vision units for military and commercial use. It also engages in product and business management consulting for medical imaging, defense imaging, consumer, automotive, industrial computing, and wireless communications. Next is COMERG. It employs top-notch engineering for the development of medicinal grade extracts and AG technology specialized equipment and machinery.

Dr. Stantchev is also the founder of DIAMAGNETIX, a tech innovation company, specializing in improving key processes in the development of Bio and Energy in a nano-material state. His last company, Pure 5 Extractions Systems, is a leading innovative botanical extraction company, with a specific focus on hemp and cannabis. Dr. Stantchev has worked on product development and manufacturing projects with Fortune 500 companies. Ivan Mendez added that "I have had the great pleasure of knowing and working with George for 5 years, in the Cannabis medicinal use field, George will be able to help us with Worldwide resource allocation and client-oriented multi-country product development and manufacturing. I find him to be a great scientist and a leader in the cannabis and hemp extraction business worldwide. He has a brilliant mind and is willing to help when he can."

Dr. Richard Goulding, Chief Medical Officer, will be pursuing the development of medical applications for graphene. This includes unique and extremely efficacious applications for medical instrumentation. Dr. Goulding stated that "my colleagues will be assisting me in developing applications for medical research and development utilizing the unique prospect of graphene involved in fluid filtration processes."

CFO and Human Resources officer, Yvonne Gallego stated, "I am excited about the potential of this rapidly growing industry and the opportunities it lends to financial growth, quality products, and innovation. I am enthusiastic about leading a business that promotes sustainability and environmental stewardship through the cultivation and use of this versatile crop to be employed in our graphene production."

"I believe Mrs. Gallego will be a valuable asset to our company just as she was at HGI Pharma Inc." states CEO Ivan Mendez.

Josh Rockwell, VP of Pulp and Paper Division. "I am excited to join Premier Graphene Inc. as VP of the Pulp and Paper Division. I am a chemical engineer from the University of New Hampshire with 25 years of innovating in the pulp and paper industry through continuous improvement. Hemp will revolutionize the way paper and other vital materials are made. I am proud to join this talented team". "I am confident Josh's role in Premier Graphene Inc. His vast experience will prove invaluable to our path forward" added CEO Ivan Mendez.

Chief Operating Officer, Mark Kingston, will oversee the day-to-day operations and some of the product development. He will interface with Biographene Technology, 10% owned by Premier, to assure a sufficient quantity of high-grade graphene manufacturing. Mr. Kingston added, "As the Chief Operating Officer of US Hemp Hurd and founder of Pyrotech US Inc., I bring a wealth of experience in managing and minimizing operational risks, ensuring regulatory compliance, and building relationships with stakeholders, customers, suppliers, and partners".

Leveraging his industrial engineering background, Mr. Kingston will drive key innovation and enhance efficiency to ensure that Premier remains at the forefront of R&D, market awareness, and delivery of commercial products and systems. "We are confident that Mark's contributions will play a crucial role in the success of our organization," says senior consultant Pedro "Pete" Mendez.

Pedro "Pete" Mendez, senior consultant to the Board, industrial hemp and cannabis researcher, and entrepreneur, specializing in acquisitions and cannabis products. As a former project manager for HGI Pharma Inc., Mr. Mendez stated: "I believe we will become the dominant force in quality graphene production (for all uses) in North America. We have assembled a unique team. We are fostering innovative technology, manufacturing, and creating a new supply chain that we can control, we will be disrupting the mined graphite market".

CEO Ivan Mendez states: "We are still in the process of interviewing two candidates for Chief Technology officer. We will be providing that information and some very exciting updates as they occur.

About Premier Graphene, Inc. (OTC: **BIEI**), engaged in a holding company reorganization so that the parent company, renamed from “Premier Biomedical Inc.”, has almost no convertible debentures (less than \$20,000) outstanding. As a result, the successor issuer public company, Premier Graphene, Inc., has nearly no debt. The predecessor issuer’s debt remains in the original company, now a subsidiary of the publicly traded company. The Company is traded on the OTC Market, in full compliance with OTC Market reporting requirements. Premier Graphene, Inc. is in the process of a single corporate action – changing its name with FINRA and thus OTC Markets. Its articles of incorporation prohibit a reverse split. It is involved in the development of sophisticated products utilizing the unique characteristics of graphene, partnering with various related corporations and unrelated corporations.
