

Qualcomm's Quest To Make Cities Smarter

By Will Townsend

NEWS RELEASE BY QUALCOMM

Northampton, MA | November 03, 2021 09:36 AM Eastern Daylight Time

Qualcomm's Durga Malladi, SVP and GM of 5G and Mobile Broadband Infrastructure.

MOOR INSIGHTS & STRATEGY

It's no secret that Qualcomm is driving the overall 5G ecosystem, thanks in large part to having its own R&D in the 5G standards space with 3GPP. Its portfolio includes industry-leading modems, RF-Front End and its class-leading system on a chip (SOC) design. In the past, the company has also supported numerous OEM customers with reference designs. Qualcomm's three-year journey with smart cities, however, has taken its reference design efforts even further. Mr. Sag and I learned that the Smart City Accelerate program now includes over 400 partners and delivers end-to-end IoT solutions across more than thirty verticals.
