- [RustStake](#): *Best for Rust Roulette*
- [RustReaper](#): *Best for Rust Crash*
- [RustClash](#): *Best for Rust Plinko*
- [RustBet](#): *Best for Rust Jackpot*
- [Bandit Camp](#): *Best for PvP Gambling*

If you want to know more about each site in particular, then you will find the complete reviews below.

Howl.GG: Best Overall Rust Gambling Site

Howl.GG is the #1 Rust gambling site nowadays because it has an outstanding number of online users throughout the day (liquidity), a great catalog of games such as Rust Roulette, Coinflip, and

Slots, and a massive welcome bonus.

Furthermore, it will bring you a FREE daily Rust case that you can open to win more skins, all without spending a single cent. In addition to other promotions such as their seasonal Jackpots and giveaways.

The game animations are outstanding, and hence, your gambling experience will be satisfactory. It's also great on mobile, so it's pretty complete in basically all the aspects that matter when evaluating a Rust gambling site.

The only thing we'd improve is the 6% average rake on coinflip and jackpot games. Other than that, Howl.GG is still the king of all the Rust gambling sites nowadays.

CSGO500: *Best for Crypto*

If you want to play at Rust casinos with cryptocurrencies, then look no further than CSGO500. This platform, which is already a rockstar in the world of CS:GO gambling, is also an excellent option when it comes to gambling with Rust skins and cases.

It supports cryptocurrencies such as BTC, USDT, ETH, DOGE, LTC, XRP, and SOL. It's the most complete Rust casino when it comes to crypto, so if that's the payment method you want to use, then CSGO500 is the way to go.

This site will also reward you with free cash that you can use on their big selection of games that include Rust Duels, Roulette, Crash, Plinko, and online and live casino games.

The only downside of CSGO500 is that it limits many countries. So, to make sure that this Rust gambling site is available to you, simply visit the website. If it's available to you, then you will be able to sign up and play without problems.

RustyLoot: *Best for Rust Mines*

RustyLoot is one of the newest Rust gambling sites in the industry, but it has managed to position itself as one of the best options nowadays, alongside solid Rust casinos such as CSGO500 and Howl.GG.

RustyLoot offers a solid free welcome bonus, so you can play games like Coinflip, Plinko, Wheel, Mines, and PVP Mines without risk.

Rustylot is the best Rust gambling website when it comes to playing PVP Mines, because it has the perfect level of liquidity (online users), an easy-to-use interface, lots of options for customization, and an exciting theme alongside great animations.

Furthermore, this site also offers excellent customer support service via live chat, and generous rakebacks rewards on jackpot games, which makes it superior to CSGO500 in this aspect.

The only downside of RustyLoot is that it's infrequent when it comes to coinflip games, so if it's that a problem for you, you should check other sites from our list such as Bandit Camp.

RustStake: *Best for Rust Roulette*

RustStake is great in many senses: it offers a generous welcome bonus of a random free Rust skin that can cost up to \$1,400, a solid Jackpot, great promos and giveaways, but when it comes to Rust Roulette, it's the best option nowadays.

RustState is the best site for playing Rust Roulette because it has multiple betting options, as opposed to the other Rust Roulette games available on other platforms. Here you can create more advanced strategies, and hence, you could end up winning more skins.

It also offers a solid Rust Skin Upgrader, free gems (free cash), a loyalty program, and a great interface on mobile. All in all, we can fully recommend this Rust gambling site to you.

However, we must note that this site has a limited number of deposit methods, so that's a disadvantage to consider.

RustReaper: *Best for Rust Crash*

If all you want to play is Rust Crash, then look no further than RustReaper. We recommend it for playing Crash because the interface is easy to use, the animations are spot on, you can play a round every 5 seconds, and you can claim exclusive bonuses for this game.

However, RustReaper has more to bring to the table. It's also great for playing Rust Blackjack, Hi-Lo, Rust Slots, Plinko, and Roulette. Furthermore, it also has a solid welcome bonus of free cash, and tons of promotions for existing users.

You can also play at RustReaper from your smartphone or tablet without problems. Once again, it's also the best Rust casino for playing mobile Rust Roulette, since it adapts perfectly to the majority of devices.

The only downsides of this platform are that it only allows you to withdraw with Rust skins and that it excludes countries such as the USA and Germany.

RustClash: *Best for Rust Plinko*

RustClash is one of our favorite sites because it brings you a generous welcome bonus of 3 FREE cases, which can make you win pretty valuable skins if you're lucky enough.

However, it's also the top website when it comes to playing Rust Plinko because the interface is ideal, it hosts several rounds per hour, it pays over 900x as the max prize, and you can claim exclusive bonuses for playing it.

It's also a solid choice for opening Rust cases, playing PVP games, coinflip, and upgrading skins.

It also hosts seasonal events and giveaways that can fill your pockets with lots of skins and cash, if you're lucky enough to win one of the biggest prizes.

The only downside to note is that the website can be a bit confusing on desktop or mobile when you use it for the first time. However, other than that, it's an excellent option for wagering your Rust skins.

RustBet: *Best for Rust Jackpot*

Simply put, if you want to play Jackpot games, then look no further than RustBet. Even though it only accepts Rust Skins as their unique payment method, if you're a die-hard fan of the game, then you won't have problems with it.

We rate it as the best site for playing Rust Jackpot because you have lots of rounds every, and the pot can get pretty big, so it makes sense to play at RustBet if your main focus is testing your luck at Jackpot.

They offer a solid welcome bonus that consists of a free case spin up to \$50, and that's a good prize since you don't have to deposit any skin to claim it.

Bandit Camp: *Best for PvP Gambling*

If you want to focus on PvP Rust gambling, then Bandit Camp will deliver the kind of games and experience you're looking for. And since it will bring you free cash as a welcome bonus, you can test their games without risk.

Bandit Camp offers the following ways of PvP gambling: Crate Battles, Coinflip Duels and Spinner Duels. They all remove the house edge from the deal, and since the website has tons of liquidity, you can play all day long if you wish to.

This website also offers two iconic games: Roulette and Beancan Blast. Both of them involve the house, but if you get a bit tired from PvP, then here you will find another way for wagering your skins.
