

Securing the Supply Chain and Critical Infrastructure

NEWS RELEASE BY KEYSIGHT TECHNOLOGIES

Northampton, MA | December 06, 2021 11:01 AM Eastern Standard Time

Gail Ow, senior industrial solutions manager at Keysight Technologies

The modern concept of a supply chain now applies to software, too. Unfortunately, hackers have noticed the increased connectedness of factories and critical infrastructure, and the improved, digital, internet-connected devices these manufacturers use are now at risk.

Gail Ow, senior industrial solutions manager at Keysight Technologies, explores how to secure the technology supply chain and why manufacturers, infrastructure, and consumers all have an active role in making our world safer.
