NEWS RELEASE BY UMBRA APPLIED TECHNOLOGIES GROUP, INC.

Tampa, FL | May 26, 2023 08:00 AM Eastern Daylight Time

Umbra Applied Technologies Group, Inc. (UAT Group) (OTC: **UATG**) - UAT Group strategic partner Next Casting Technologies has been issued a patent for technology it developed for use in its advanced SmartCast, IntelliBrace and BioSplint products. Filed in December of 2017, this patent was one of four patents that had been pending. The Company anticipates remaining patents being approved over the next ten to twelve months.

Next Casting Technologies (NCT) has begun the process of commercializing proprietary technologies which will positively impact people's lives and increase value through a unique and diverse product line. The SmartCast Application allows the casting technician to slip the SmartCast around the affected limb and position to fit by using a simple "mold and hold" technique. Lastly, the cast is activated by pressing the button to initiate the curing process. Within 4 minutes that cast is hardened, fixed in place and is not dependent on the technician's artistry, or lack thereof. The results are a predictable standard of care across the patient spectrum. The end result is a completely waterproof, antimicrobial, orthopedic cast, that is time saving for clinicians and a superior standard of care for patients.

UAT Group's Chief Executive Officer Alex Umbra, stated, "This marks a significant step forward for NCT. Having the appropriate measures in place to protect intellectual property enables the Company to begin evaluating production schedules, supply chain resources and fulfillment execution strategies. I look forward to working with the NCT team in the near-term future as they begin their ramp up."

UAT Group has a 26% equity interest in NCT.
