

# VBOX announces ATSC 3.0 Android TV GATEWAY

Receive, Watch, Stream and Record Live ATSC 3.0 TV

NEWS RELEASE BY VBOX COMMUNICATIONS

**Herzliya, Israel | May 04, 2021 09:03 AM Eastern Daylight Time**

VBox Communications, an expert in streaming and recording Live broadcast TV announced today the **ATSC 3.0 Android TV Gateway**, implementing the addition of **ATSC 3.0 receiving and streaming** capability to their TV Gateway product line, running certified Android TV OS, delivering both online streaming services and up to 4K Live TV channels at home, using a single box.

The *ATSC 3.0 Android TV Gateway* is a first of its kind device, which offers reception of the emerging ATSC 3.0 standard, enabling:

- ATSC 3.0 reception via ROUTE and DASH protocols.
- HDMI connection for ATSC 3.0 and ATSC 1.0 viewing
- Streaming HEVC 4K video and Dolby AC-4 Audio to compatible devices.
- Electronic Service Guides.
- Advanced Emergency Alerts.
- Recasting the content to numerous network connected devices (mobile phones, tablets, computers and TV screens).
- SDK provision to enable 3<sup>rd</sup>-party developments.

The product offers a unique approach to address video networking features under the new ATSC 3.0 standard, which sees increasing deployments throughout the US, targeting content delivery companies, Service providers, SDK provision to Android and Linux App developers, as well as home users who will benefit from receiving the ATSC 3.0 signal and utilizing it in many various ways.

“Not only our product enables users to stream and record their favorite content, allowing them to watch anywhere they travel to, we have implemented the ATSC 3.0 standard, Introducing the newest and most advanced Android device on the market which receives a clear highest quality video signal, to be watched anywhere and on any device” said Jonathan Rind VBox’s Marketing Director. “This product helps implement and make the innovative ATSC 3.0 protocol accessible to the broadcasting industry and its introduction opens a plethora of new developments, new applications and a new level of viewing quality”

The VBox ATSC 3.0 Android TV Gateway is available for testing and evaluation starting May 2021 - please contact us on [marketing@vboxcomm.com](mailto:marketing@vboxcomm.com) for more details.
