NEWS RELEASE BY PRODIGY PRESS WIRE

**Parsippany, New Jersey | June 01, 2023 10:00 AM Eastern Daylight Time**

**Wage Parity Experts**, a leading tech-based third-party administrator (TPA), announces their strategic expansion plan into 26 states in the United States. Known for their expertise in navigating complex Wage Parity and Prevailing Wage laws, Wage Parity Experts provides innovative solutions and high-quality administration services to home care agencies and construction contractors.

With their proprietary software designed specifically to address the intricacies of Wage Parity and Prevailing Wage laws, the platform offers a simplified solution for their clients' compliance challenges. By combining intelligent technology with their extensive knowledge, they streamline the administration process and ensure ethical and transparent experiences for both clients and employees.

"We understand the complexities and unique requirements of Wage Parity and Prevailing Wage laws. Our goal is to alleviate administrative burdens for our clients, attract and retain top talent, and ultimately ensure compliance with these laws. We are excited to bring our expertise to a wider range of clients across these 26 states", says Jamel Wright, the Founder, and CEO of **Wage Parity Experts**.

Wage Parity Experts takes a personalized approach, recognizing that there is no "one size fits all" solution for their clients. Each company receives an individualized plan tailored to its specific needs. The implementation specialists at Wage Parity Experts guide clients through the setup process, taking the time to get every detail right from the beginning. This meticulous approach ensures that ongoing servicing is pain-free and allows clients to focus on their core business operations.

One of the key differentiators of Wage Parity Experts is their commitment to empowering employees. Unlike traditional models where employees have little to no say in their benefits, Wage Parity Experts allows employees to choose their own benefits through their user-friendly app or software. Employees can conveniently access a menu of available options, select their desired benefits, and customize their packages to suit their

individual needs. This level of control over benefits provides employees with a sense of empowerment and ensures they receive the benefits they value the most.

Moreover, the platform recognizes the diverse workforce in industries such as home care and construction. They have developed an employee portal that supports over 70 languages, enabling employees to view and manage their wages and benefits in their native language. This bridge of communication ensures that all employees, regardless of their native language, have equal access to vital information and services.

As part of their expansion plan, Wage Parity Experts is investing in comprehensive digital marketing campaigns to raise awareness and generate interest in the 26 target states. By leveraging prominent social media platforms they aim to reach industry professionals and decision-makers effectively. Furthermore, Wage Parity Experts is actively seeking collaborations with industry associations, including the Association of General Contractors, to enhance their visibility and credibility within the market.

"We are excited about our expansion into these 26 states. We believe that our expertise in Wage Parity and Prevailing Wage laws, combined with our dedication to personalized service, will make a significant impact on compliance and employee satisfaction. We look forward to serving an even broader client base and helping them navigate the complexities of these laws", Jamel Wright added.

Wage Parity Experts' expansion plan marks a significant milestone in their mission to simplify compliance and administration for home care agencies and construction contractors across the United States. With its innovative technology, personalized approach, and commitment to employee empowerment, the platform is poised to become the go-to partner for companies seeking streamlined solutions for Wage Parity and Prevailing Wage compliance.
