

Webinar: First Net Zero McDonald's Restaurant

NEWS RELEASE BY WSP

Northampton, MA | July 28, 2021 02:06 PM Eastern Daylight Time

A new McDonald's restaurant was opened at Walt Disney World Resort in Florida that run 100% on renewable energy generated on site with a massive canopy of PV arrays. WSP has delivered MEP design, Energy Analysis and Sustainability services for the flagship project with extensive analysis helping the architect and client achieving the net zero goal. This session covers the challenges and stories behind meeting the stringent net zero target for an energy intensive building type.

Presenters: Mohammad H. Abbasi - Building Performance Consultant, WSP USA
Joe Millham - Associate, HVAC Engineer, Property & Buildings, WSP USA
