

BRINGING CITIZEN SCIENCE INTO THE CLASSROOM

TEACHERS' CONVENTION

Here are some resources to help get you started:

Examples of projects and resources tied to the curriculum for Kindergarten and Grades 1 through 12 (primarily focused on science).

Birds Canada: Resources for getting your own region-specific identification guide and tally sheet, with a link to sign up for the Great Backyard Bird Count!

Canva template for creating your own Species Recording Sheet. Use it for any sort of field data gathering, depending on grade and theme.

BRINGING CITIZEN SCIENCE INTO THE CLASSROOM

TEACHERS' CONVENTION

Here are some resources to help get you dive deeper:

Citizen Science project planner template: for when you need to write out your plan of how to get your class involved & invested!

SciStarter's Citizen Science Training Module: a free resource for helping folks to learn more about the reasoning and best practices of citizen science!

CWF's BioBlitz-in-a-Box: a PDF giving understandable, comprehensive instructions for how to create your own BioBlitz! A great way to help your community understand their local biodiversity

The Chicago Field Museum has provided a number of resources for helping folks create their own field guide, if you're so inclined! Great for older grades.
