

PEDIATRIC EYE DISEASE INVESTIGATOR GROUP (PEDIG) POLICIES
Revised February 20, 2020

I. Funding

Major studies are funded through cooperative agreements between the National Eye Institute (NEI) and the Jaeb Center for Health Research.

Other sources of funding may be sought to cover PEDIG expenses or additional studies upon approval of the NEI and the Executive Committee.

A. Funding for Clinical Sites

Each investigator must have a signed agreement between his/her institution or legal entity and the Jaeb Center. The agreement will indicate the payment schedule for participation in each protocol and the obligations of the investigator and institution. A payment schedule will be established for each protocol and payments vary depending upon the level of complexity of the study in terms of time necessary.

Sites are compensated on a per-patient basis for their participation in a protocol. Generally, funding will be provided for each enrollment and each follow-up visit, or phone call/chart review data collection.

B. Committees

Committee members not already compensated for percent effort through a subcontract with the Jaeb Center may receive a consulting payment to partially compensate them for the time they devote to the committee in attending meetings, participating in conference calls, review of materials or other activities associated with the committee.

C. Patient Costs

Grant funds are intended to pay for clinical and other procedures that are purely for research and otherwise would not have been performed on the patient. Most PEDIG protocols will be established to conform to standard medical care as closely as possible. The per-patient funding provided to the site is expected to cover the additional time necessary on the part of the investigator and his/her office staff. This per-patient funding is also expected to cover the costs of maintaining an Internet connection and usage time and study-directed time on the part of the investigator in areas such as promoting recruitment, screening patients who would otherwise not be examined, educating the parents or guardians of eligible patients about the study and obtaining informed consent, responding to calls from the parents or guardians during the study, and addressing edits and queries from the Coordinating Center.

When a care provider performs services that would be considered routine standard of care independent of the study, it is appropriate to bill the patient's insurance company for these services.

Research funds will be used to pay for supplies, medications, spectacles, etc. that would not be required as part of the patient's routine care.

In some studies, patients may be compensated to cover visit-related costs. Generally, a distinction will be made between usual-care visits for which compensation is not typically provided and protocol-required visits for which compensation for the study visit per se will be provided.

D. Participation of Investigators in ‘Competing’ Studies

Competing studies are defined as those with overlapping eligibility criteria. To ensure that human subjects issues are appropriately addressed, if a PEDIG site is involved in competing studies, the site should submit a brief statement to the Operations Committee that summarizes the studies and describes how the site will manage both studies. For example, which patients will be offered enrollment into one study versus the other? Participation in the PEDIG study will be contingent on OC approval.

E. Financial Disclosure Policies

The PEDIG Network has developed financial disclosure policies (see Policy Appendix I: PEDIG Financial Disclosure Policies) to promote objectivity in research by establishing policies that provide a reasonable expectation that the design, conduct, and reporting of PEDIG Network research is free from bias resulting from investigator financial conflicts of interest.

II. Selection of Protocols

A. Process

A process has been developed for evaluation and prioritization of protocols within the PEDIG network.

- Any PEDIG investigator may propose a protocol.
- The protocol proposal form is available on the PEDIG website.
- A formal solicitation to the study group for new study ideas is made in November of each year, in preparation for review of new study ideas at the Winter PEDIG Study Group meeting.
- Open discussion of ideas occurs at PEDIG investigator meetings (i.e., American Academy of Ophthalmology, American Academy of Optometry, AAPOS, and both the Summer and Winter PEDIG Investigator meetings)
- Each winter, the PEDIG Executive Committee selects up to 15 of these potential studies for further development, based on public health impact and investigator group interest.
- Members of the Operations Committee, in consultation with the Coordinating Center and primary proponents of each proposal, will oversee the creation of a brief protocol proposal (5-7 pages each) that addresses the following:
 - Background, significance, and public health importance
 - Protocol outline (including flow diagram, if applicable)
 - Outcome measures
 - Sample size and statistical considerations
 - Recruitment potential
- The PEDIG Executive Committee will meet for one day each spring to evaluate these protocol proposals and to determine which studies should have full protocols developed and the timeline for their development.
- Feedback will be given to the proponents of each protocol. Those protocols that were not selected may be brought forward for consideration in future cycles. A planning committee will be formed to develop a full protocol for each protocol selected.
- Each fully developed protocol will be circulated to all PEDIG investigators for input prior to final review and approval by the PEDIG Executive Committee and the Data

PEDIATRIC EYE DISEASE INVESTIGATOR GROUP (PEDIG) POLICIES

Revised February 20, 2020

94 Safety and Monitoring Committee (DSMC), if applicable. An additional step of external
95 review may be necessary prior to review by the DSMC, at the discretion of the NEI.

- 96 • The cycle of study idea solicitation, discussion, Executive Committee review, protocol
97 selection and development is repeated yearly.
- 98 • If a previously prioritized protocol is not launched during the preceding year, the protocol
99 idea will be brought back for re-consideration at the next EC prioritization meeting,
100 because other new protocol ideas may be deemed to be more important for PEDIG to
101 pursue.

102
103 Occasionally, a protocol proposal may have extremely high public health importance and may be
104 prioritized by the Executive Committee for rapid development and implementation outside the
105 yearly cycle described above.

107 **III. Patient Protection and Data Quality**

109 **A. Institutional Review Board (IRB)**

110 Each site must obtain approval from an IRB for each protocol in which it participates before
111 patients can be enrolled. The site must abide by the reporting requirements of the IRB. All
112 changes in research activities and all unanticipated problems involving risks to patients must be
113 reported immediately. Protocol changes require IRB approval before implementation, except
114 when required to eliminate apparent immediate hazards to patients. Modifications to study
115 procedures, which do not constitute a meaningful change in the protocol and do not impact in
116 any way on patient safety, do not require prior IRB approval.

117
118 IRB coverage must remain current. The Coordinating Center will send a reminder to each site
119 approximately 2 months prior to the expiration of IRB coverage for a protocol (a protocol update
120 for the IRB will be included). If IRB coverage lapses, the site cannot enroll any new patients,
121 cannot perform study specific procedures on enrolled subjects, and cannot submit data forms to
122 the Coordinating Center for any established study patients until IRB coverage is back in effect.

123
124 Individuals who are not at institutions with their own IRB are permitted to use the Jaeb Center
125 IRB.

127 **B. Informed Consent**

128 An informed consent form must be signed by the parent/guardian before any procedures are
129 performed that are specific to a study (i.e., not part of patient's routine care). The Informed
130 Consent Form will contain information about the objectives of the study, the procedures
131 followed during the study, and the risks and restrictions of the study, with special reference to
132 possible side effects of the treatments. The form will be in compliance with the guidelines of the
133 Office for Human Research Protections (OHRP) and the IRB.

135 **C. Policy for Website Use**

136 All study personnel must log onto the PEDIG website only using their individually created
137 password and must not share their password with others. Under no circumstances may an
138 investigator delegate signing of study forms to an assistant who logs in using the investigator's
139 password.

PEDIATRIC EYE DISEASE INVESTIGATOR GROUP (PEDIG) POLICIES

Revised February 20, 2020

141 **1. Electronic Signature**

142 An electronic signature on an electronic case report form indicates that the data have been
143 reviewed and accepted by the signatory. Electronic signatures will consist of the combination of
144 the individually assigned PEDIG personnel identification number and password. It is unlawful
145 to forge an electronic signature.

146 147 **D. Data Quality**

148 Each site is monitored for adherence to the protocol and good clinical practices. Sites or study
149 group members with excessive protocol deviations and/or quality issues may be placed on
150 probation for a period of time and/or dismissed from PEDIG at the discretion of the Executive
151 Committee.

152
153 Site visits will be conducted to ensure quality. The site visit policy may vary from study to study
154 and will be determined by the Operations Committee. In general, a site visit will be performed
155 annually, but may occur more often when: (1) there are concerns about data integrity; (2) a site
156 enrolls or is projected to enroll at least 10% of the patients in a study; or (3) a site enrolls a
157 subject into a study covered by an IND. All sites are subject to site visits and, to participate in
158 PEDIG, they must agree to cooperate for site visits.

159 160 **E. Scientific Fraud**

161 Scientific fraud refers to the situation where data are actually fabricated. Examples include (1)
162 altering information collected from a patient that would have excluded the patient so that the
163 patient appears to be eligible for the study, (2) randomization of patients prior to obtaining
164 informed consent and changing the date on the informed consent form to conform with the
165 randomization date, (3) changing examination dates so that they appear as being in the time
166 windows specified in the protocol, and (4) altering outcome measurements.

167
168 Although the goal of every study is to have perfect compliance with every aspect of the protocol,
169 this is not always possible. Patient adherence will never be 100%. Problems will occur with
170 medication compliance (where applicable) and missed visits. Misclassification of the outcome is
171 also possible. In determining a sample size estimate for the study, an adjustment is made to
172 account for expected losses to follow up, number of misdiagnosed patients, and number of patients
173 who do not comply with their treatment assignment.

174
175 It is expected that clinic personnel will make mistakes. Unintentional errors that occur in data
176 collection are not scientific fraud. Repeated mistakes may be a sign of poor clinic performance
177 and these are tabulated by the Coordinating Center, but they do not imply fraud. Errors become a
178 concern when a clinic is making more mistakes than expected, particularly major ones (e.g.,
179 enrolling ineligible patients).

180
181 An investigator has the responsibility of assuring that the protocol is carried out properly at their
182 site and assumes responsibility for the staff involved in the care of and data collection for study
183 patients. An investigator who suspects data irregularities should report this to the CC immediately.

184
185 Study group members are expected to remain in good standing with their profession. If a study
186 group member fails to adhere to the ethical standards of their profession, the Executive
187 Committee may revoke study group membership.

PEDIATRIC EYE DISEASE INVESTIGATOR GROUP (PEDIG) POLICIES

Revised February 20, 2020

188

189 **F. Confidentiality**

190 Individual patient medical information obtained as a result of a study is considered confidential
191 and disclosure to third parties other than those noted below (or on the informed consent) is
192 prohibited. Such medical information may be given to the patient's personal physician or to other
193 appropriate medical personnel responsible for the patient's welfare. Data generated as a result of
194 studies are to be available for inspection upon request by the Coordinating Center, the NIH, and
195 auditors of other regulatory agencies.

196

197 All sites and PEDIG units must conform to HIPAA regulations.

198

199 Study data are considered confidential until presented at a national meeting or published as an
200 abstract or manuscript.

201

202 **G. Retention of Study Records**

203 The principal investigator at each site will archive all relevant study data and keep them on file
204 for the period of time specified by US law or by their IRB, whichever is longer.

205

206 **IV. Communications**

207 For most protocols, real-time internet access will be required for data entry of case report forms.

208

209 **V. Study Group Meetings**

210 Study group meetings are planned each year for participating study group members. These
211 meetings may be used to; develop and approve primary study manuscripts, to help refine
212 protocols in development, and to review procedures and issues of ongoing protocols. The
213 PEDIG Operations Committee will define which study group members are invited, but in general
214 study personnel from sites meeting the networks policy on site activity (see section VII. A.) will
215 be eligible for invitation. The costs of their attendance will be reimbursed, including hotel,
216 airfare and a per diem.

217

218 General PEDIG meetings may be held in conjunction with the American Academy of
219 Ophthalmology, American Academy of Optometry, and AAPOS meetings. Each investigator is
220 expected to attend at least one of these meetings yearly. Generally, there will be a meeting for
221 all PEDIG investigators at which the status of current and planned protocols will be discussed
222 and topics for possible future studies will be presented. Separate meetings on the same day may
223 be held for investigators participating in specific protocols as needed.

224

225 **VI. Editorial Policy**

226

227 **A. Manuscripts**

228 The methods and results of each protocol conducted by PEDIG will be reported in one or more
229 manuscripts. Ownership of the data collected as part of all network protocols resides with the
230 investigators. These data are confidential and may not be presented or published by individual
231 investigators. Datasets are maintained at the Jaeb Center and released for reporting in
232 publications and presentations according to the policies below. If an investigator wishes to
233 include PEDIG study subjects in his/her own research publication or presentation, there cannot
234 be overlap with respect to PEDIG study objectives, which are stated in study protocols that are

PEDIATRIC EYE DISEASE INVESTIGATOR GROUP (PEDIG) POLICIES

Revised February 20, 2020

235 available on the PEDIG web site. If there is possible overlap with respect to PEDIG study
236 objectives, a request should be submitted to the Executive Committee.

237
238 The network “Sponsor”, the National Eye Institute (NEI) of the National Institutes of Health,
239 will be provided an opportunity to review and comment on each manuscript, but will have no
240 authority to restrict publication or presentation of study results. Should the network become
241 involved with other entities that serve as co-sponsors with the NEI, this same policy will be in
242 effect.

243
244 All manuscripts to be written and all national/international presentations to be made related to
245 any aspect of the project, including but not limited to study protocols, study results, and study
246 conduct, must receive the approval of the Steering Committee (or Executive Committee, if no
247 Steering Committee applies) and the Operations Committee. The topic of the manuscript may be
248 initiated by the Executive Committee, Steering Committee, Operations Committee, or by an
249 investigator.

250
251 Because every investigator cannot have an active role in writing every paper, the Operations
252 Committee will establish a Writing Committee and select a Writing Committee Chair for each
253 manuscript.

254
255 For major manuscripts, PEDIG will be listed as the author on the title page, if this meets with
256 journal approval; or “Study XXX Investigators for PEDIG”, if the journal does not allow PEDIG
257 as the author. The writing committee will be listed with the Writing Committee Chair as first
258 author, followed by other primary authors, including the study statistician. Writing committee
259 members (other than primary authors) will be listed based upon level of contribution to the
260 manuscript, and then by order of number of subject’s completing primary outcome exam for the
261 study as applicable. The authorship listing for the writing committee will be suggested by the
262 Operations Committee member assigned to the manuscript, in consultation with the Writing
263 Committee Chair(s) and the Study Statistician. The list may be modified by the Operations
264 Committee to recognize other contributions.

265
266 All investigators who participated in the protocol (1) will be given an opportunity to review and
267 comment on the draft manuscript, (2) will be listed in the manuscript participant appendix, and
268 (3) may include the manuscript on their CVs as a co-author. Each manuscript will acknowledge
269 the NIH funding and any other sources of funding.

270
271 For a secondary manuscript, the investigators involved in writing the paper will be listed by
272 name (ordered as described above) followed by “for the Pediatric Eye Disease Investigator
273 Group.” The policy on author order will follow that of primary manuscripts (as previously
274 described).

275
276 For studies conducted within PEDIG by a subset of sites, the investigators will be listed as
277 authors followed by “for Pediatric Eye Disease Investigator Group” as long as the number of
278 authors does not exceed the journal limit. If the subset of sites is a named group (e.g., COMET),
279 the group will be listed as the author followed by “for Pediatric Eye Disease Investigator Group”.
280 The definition of 'subset of sites' will be decided by the PEDIG Executive Committee on a case-
281 by-case basis.

PEDIATRIC EYE DISEASE INVESTIGATOR GROUP (PEDIG) POLICIES

Revised February 20, 2020

282

283 For a manuscript describing the major results of a protocol, the DSMC must approve it prior to
284 submission. The DSMC may be sent secondary manuscripts for comment as determined by the
285 Executive Committee, but approval will not be required.

286

287 **B. Abstracts**

288 All abstracts must be approved by the Operations Committee prior to submission. Abstracts
289 requiring DSMC approval (major results manuscripts) must be submitted to the Coordinating
290 Center at least 8 weeks prior to the submission deadline. Abstracts not requiring DSMC
291 approval must be submitted to the Coordinating Center at least 4 weeks prior to the submission
292 deadline. If data are needed for the abstract that have not been previously compiled and verified
293 by the Coordinating Center, the Coordinating Center must be contacted at least 8 weeks prior to
294 the submission date.

295

296 For an abstract associated with a manuscript, the entire writing committee will be listed as
297 authors, if possible. If not possible, the presenter will be listed as the author, followed by lead
298 authors including statistician if applicable, on behalf of the Pediatric Eye Disease Investigator
299 Group. When an abstract is not associated with a manuscript, the authors will be those who
300 worked on the abstract.

301

302 **C. Presentations**

303

304 **1. PEDIG Authored Presentations**

305 When PEDIG is listed as an author for any presentation at any meeting, investigators or
306 coordinators must forward their presentation for review by the Operations Committee at least 4
307 weeks before the presentation.

308

309 **2. Other National and International Presentations**

310 When investigators or coordinators present new PEDIG data (not previously published or
311 presented) at any national or international meeting, they **must** forward their slides to the
312 Operations Committee for review at least 4 weeks before the presentation.

313

314 When investigators or coordinators present publically available PEDIG data (previously
315 published or presented) at any national or international meeting, they **may** (at their own
316 discretion) forward their slides to the Operations Committee for review, and, if they do so, this
317 should be at least 4 weeks before the presentation.

318

319 **3. Institutional, Local, and Regional Presentations**

320 Investigators or coordinators presenting published PEDIG data at institutional, local, and
321 regional meetings are strongly encouraged to use the slides available on the PEDIG website, but
322 are not required to submit their slides for approval to the Operations Committee, if the
323 presentation is to an institutional, local or regional group.

324

325 **4. Providing Slides to the Trade Press**

326 PEDIG-authored slides, and slides approved by the Operations Committee, should **not** be
327 provided to the trade press. If the trade press elects to report the results from a PEDIG
328 presentation, and informs the investigator or coordinator of their intentions, the investigator or

PEDIATRIC EYE DISEASE INVESTIGATOR GROUP (PEDIG) POLICIES

Revised February 20, 2020

329 coordinator may review the draft text for factual errors, but should avoid allowing the journalist
330 to report “in collaboration with...or reviewed by...” Any press release or publicity about a
331 specific study is subject to review and approval prior to release as described in the following
332 section.

333

334 **D. Publicity**

335 For publicity timed with publication of primary study results, the involved Steering Committee
336 and the Executive Committee must give approval prior to any press release or other publicity
337 about the study. For NEI-funded studies, the DSMC and NEI also must approve release of study
338 findings to the media.

339

340 Requests for comment or press releases on behalf of PEDIG on results already published or
341 presented require review of the protocol chair responsible for the study; and the network chair if
342 the protocol chair is not a member of the Operations Committee.

343

344 PEDIG investigators may develop mailings to promote study recruitment. These mailings must
345 be approved by the IRB and the PEDIG Operations Committee.

346

347 Participation in the PEDIG network may be mentioned in other mailings, web-postings, and
348 publicity materials to the extent that involvement is accurately portrayed. It is important that
349 such mailings not be construed as citing PEDIG involvement for self-promotion and that such
350 mailings do not include remarks that might be considered disparaging by other investigators in
351 the network.

352

353 Any letter, flyer or other such promotional material must be reviewed by the Operations
354 Committee prior to distribution. If PEDIG is providing funds for distribution of such mailings,
355 we will inform nearby sites and give them the right to be included in the mailing or offer them
356 the opportunity to distribute something similar. However, if PEDIG is not funding the
357 distribution of such mailings, we would check the mailing for accuracy but cannot require other
358 sites to be listed.

359

360 **VII. Maintenance of Active Status**

361

362 **A. Site Status**

363 The Executive Committee will evaluate the types of active protocols before the end of each year
364 in order to define for the following year the minimum amount of activity with respect to
365 enrollment and/or follow-up each site is expected to complete to maintain active site status
366 within the network.

367

368 Sites that have not met the activity requirement in a 12-month period will be made inactive and
369 their investigators and coordinators cannot attend expenses-paid group meetings. Once a site is
370 made inactive, the site has to reapply for PEDIG site status.

371

372 New sites must be certified for their first protocol within 12 months of being accepted as a
373 PEDIG site. Certification efforts at the Coordinating Center will end after 12 months.

374

PEDIATRIC EYE DISEASE INVESTIGATOR GROUP (PEDIG) POLICIES

Revised February 20, 2020

375 VIII. Industry and Other Entity Collaborations

376 The PEDIG collaborates with related industries and other entities in a manner that appreciates
377 the needs of those industries or other entities with regard to drug, biologic, or device
378 development while maintaining clinical trial design, investigational ethics, and rigorous
379 implementation consistent with academic standards. The PEDIG has policies related to these
380 collaborations, including protocol development, study data, publications, presentations, and
381 publicity, data integrity, clinical sites, site monitoring, adverse event reporting, efficacy and
382 safety reviews, investigational product, laboratory measurements, FDA or other regulatory
383 registration and submission, study committees and oversight, legal agreements, and cost sharing.
384 (See Policy Appendix II: PEDIG Industry Collaboration Policies for detailed information.)
385

386 Appendices

387
388 **Appendix I: PEDIG Financial Disclosure Policies**

389
390 **Appendix II: PEDIG Industry Collaboration Policies**
391

Policy Appendix I: PEDIG Financial Disclosure Policies

Version 1.0, February 20, 2020

1 The policy will be reviewed for potential revisions at least annually by the Executive Committee.

2 **A. Financial Disclosure Policy Overview**

3 Based on U.S. Public Health Service regulations (42 CFR Part 50 Subpart F), the PEDIG
4 Network has developed a policy to promote objectivity in research by establishing a policy that
5 provides a reasonable expectation that the design, conduct, and reporting of PEDIG Network
6 research is free from bias resulting from investigator financial conflicts of interest. For the
7 purposes of this policy, the term “investigator” means any member of the PEDIG Network who
8 is expected to disclose financial interests.

9 Investigators are expected to be discriminating in the selection of outside commitments in order to
10 avoid impairment of the Network’s reputation as a leading research entity. Investigators should
11 avoid commitments that could compromise the basic scholarly independence and freedom of
12 action that are central to the Network.

13 Investigators at an institution without a Financial Conflict of Interest Policy that have elected to
14 follow the Jaeb Center for Health Research (JCHR) Financial Conflict of Interest Policy are
15 required to be trained on the JCHR Financial Conflict of Interest Policy. The PEDIG Network
16 policy is consistent with and complimentary to the JCHR IRB Conflict of Interest Policy ().
17 Training must occur no less than every four (4) years and whenever the JCHR COI SOP is revised
18 with major changes.

19 **B. Definitions**

20 **1. Investigator Responsibilities**

21 *Investigator responsibilities* refers to the responsibilities related to the investigators position.
22 These may include professional responsibilities such as teaching, consulting, research,
23 professional practice, institutional committee membership, and service on panels such as IRBs or
24 Data and Safety Monitoring Boards.

26 **2. Significant Financial Interest**

27 A *significant financial interest (SFI)* consists of one or more of the following interests of the
28 investigator (or those of the investigator’s spouse and dependent children):

- 29 • With regard to any publicly traded entity, a *significant financial interest* exists if the
30 value of any remuneration received from the entity in the 12 months preceding the
31 disclosure and the value of any equity interest in the entity as of the date of disclosure
32 exceeds \$5,000.00. For purposes of this definition, remuneration includes salary and
33 any payment for services not otherwise identified as salary (*e.g.*, consulting fees,
34 honoraria, paid authorship); equity interest includes any stock, stock option, or other
35 ownership interest, as determined through reference to public prices or other
36 reasonable measures of fair market value.
- 37 • With regard to any non-publicly traded for-profit entity, a SFI exists if the value of
38 any remuneration received from the entity in the 12 months preceding the disclosure
39 exceeds \$5,000.00. A SFI also exists when the investigator (or the investigator’s
40 spouse or dependent children) holds any equity interest (*e.g.*, stock, stock option, or
41 other ownership interest) in a non-publicly traded entity.

Policy Appendix I: PEDIG Financial Disclosure Policies

Version 1.0, February 20, 2020

- 42 • Intellectual property rights and interests (e.g., patents, copyrights), upon receipt of
43 income related to such rights and interests.

44

45 In addition, an SFI exists whether remuneration is paid directly to the investigator OR to the
46 investigator's institution/legal entity on the investigator's behalf.

47 The term *significant financial interest* does not include the following types of financial interests:

- 48 • Salary, royalties, or other remuneration paid by Jaeb Center for Health Research
49 (JCHR) to the investigator if the investigator is currently employed or otherwise
50 appointed by JCHR, including intellectual property rights assigned to JCHR and
51 agreements to share in royalties related to such rights;
- 52 • Income from investment vehicles, such as mutual funds and retirement accounts, as
53 long as the Employee does not directly control the investment decisions made in these
54 vehicles.
- 55 • Income from seminars, lectures, or teaching engagements sponsored by
- 56 ○ a Federal, state, or local government agency,
57 ○ an Institution of higher education as defined at 20 U.S.C. 1001(a),
58 ○ an academic teaching hospital,
59 ○ a medical center, or
60 ○ a research institute that is affiliated with an Institution of higher education;
- 61 • Income from service on advisory committees or review panels for
- 62 ○ a Federal, state, or local government agency,
63 ○ an Institution of higher education as defined at 20 U.S.C. 1001(a),
64 ○ an academic teaching hospital,
65 ○ a medical center, or
66 ○ a research institute that is affiliated with an Institution of higher education.

67

68 **2. Financial Conflict of Interest**

69 An SFI is considered to be a *financial conflict of interest (FCOI)* if it could directly and
70 significantly affect the design, conduct, or reporting of research. See section D below for PEDIG
71 Network policy on avoiding FCOI.

72

73 **3. Related Research**

74 *Related to PEDIG Network research* means an entity that provides funding or support for PEDIG
75 Network research or whose financial interest would reasonably appear to have the potential to be
76 directly or indirectly materially affected by the outcome or conduct of the PEDIG Network
77 research. Examples include, but are not limited to, companies that hold patent rights for
78 discoveries, drugs or devices being studied in PEDIG Network protocols or companies that
79 provide financial or in-kind support for research projects. This term includes companies that
80 compete with any companies that collaborate with the PEDIG Network or compete with the
81 manufacturer of the investigational product, if the PEDIG Network investigator knows that the
82 financial interests of such a company would reasonably appear to be affected by PEDIG Network
83 research. This term also includes any entity acting as the agent of a financially interested
84 company (e.g., a contract research organization). If there is any ambiguity as to whether the
85 company is related to PEDIG Network research, the company must be disclosed. In these cases,

Policy Appendix I: PEDIG Financial Disclosure Policies

Version 1.0, February 20, 2020

86 by examining the company's business and the scope of research conducted by the PEDIG
87 Network, the Network Chair/ and the Director of the Coordinating Center (or Executive
88 Committee, where applicable) will judge whether the investigator's interest is with a "financially
89 interested company".

90

91 **C. Reporting Financial Disclosures**

92 **1. Personnel Required to Report**

93 All PEDIG Network investigators, coordinators, committee members, and other individuals who
94 are responsible for the design, conduct, or reporting of research (e.g., collaborators or
95 consultants), are required to report financial interests according to this policy (note: throughout
96 the remainder of this document, wherever the term "investigator" is used, it also should be
97 considered as indicative of committee members and other individuals in the Network required to
98 report this information). Being *responsible for the conduct of research* is not the same as
99 performing a study procedure. For instance, a study staff member who conducts visual acuity
100 testing on a study participant is not considered an investigator. Financial interest of an
101 investigator's dependent(s), domestic partner, or spouse also must be disclosed.

102

103 In general, clinical site staff other than study investigators and study coordinators are not
104 required to report financial interests according to this policy unless participating on a Network
105 committee (e.g., Writing Committee, Executive Committee, etc.).

106

107 **2. Financial Interests to Disclose**

108 All significant financial interests (SFI) from an entity Related to PEDIG Network Research must
109 be disclosed. Disclosure is required whether remuneration is paid directly to the investigator OR
110 to the investigator's institution/legal entity on the investigator's behalf. Relationships unrelated
111 to PEDIG Network research do not require disclosure.

112

113 **3. Frequency of Reporting**

114 Investigators are required to complete the PEDIG Network financial disclosure form:

115

1) annually, each January,

116

2) within 30 days of discovering or acquiring (e.g., through purchase, marriage, or
117 inheritance) a new SFI or a substantial change to an SFI.

118

- A substantial change is defined as when a previously reported SFI increases to a
119 higher category level defined as follows: \$10,000–\$19,999; amounts between
120 \$20,000–\$100,000 by increments of \$20,000; amounts above \$100,000 by
121 increments of \$50,000.

122

123 IRB requirements for reporting SFI prior to initiation of a new protocol will be followed.

124

125 **4. Disclosure Process Details**

126 Financial disclosures are completed on the PEDIG Network study website Financial Disclosure
127 Form.

128

129 Financial disclosures are made separately for the following categories:

Policy Appendix I: PEDIG Financial Disclosure Policies

Version 1.0, February 20, 2020

- 130 • Prospective Clinical or Epidemiological Research Grant – a grant from the entity paid to
131 an organization for the conduct of a prospective clinical study or epidemiologic study that
132 receives IRB approval
- 133 • Basic Science Laboratory Research Grant - a grant from the entity paid to an organization
134 for the conduct of basic science laboratory research
- 135 • Other Research Grant – Investigator-initiated research not meeting criteria above that is
136 conducted for scientific or public health purposes and not considered Work for Hire for
137 the benefit of the company. A research grant in this category should be money that is
138 paid for a specific research purpose with the intent that the results will be reported in a
139 scientific publication. In general this research would be investigator-initiated, would
140 have a budget, protocol, statistical analysis plan, or similar document describing the
141 research and would receive IRB review with either IRB approval of the activity or
142 designation as exempt research.
 - 143 ○ Details (e.g., protocol, statistical analysis plan, IRB approval, or similar
144 document) of activities conducted in this category may be requested for
145 clarification of appropriate reporting.
- 146 • Professional Fees– monies paid to an individual or to an organization for services
147 rendered, including honoraria, royalties, or fees for consulting, lectures, speakers’
148 bureaus, expert testimony, employment, board membership, office positions, or other
149 affiliations
- 150 • Patents (planned, pending, or issued)
- 151 • Stock/stock options
- 152 • Other including non-financial support –equipment, supplies, or anything else not covered
153 in the above categories.

154
155 All classifications above are irrespective of whether receipt of the financial support is directly to
156 the investigator or to the investigator’s institution/legal entity. The investigator will indicate
157 whether he/she has equity in the institution/legal entity.

158
159 Support paid to the investigator and support paid to the institution for research will be reported
160 within the following categories: \$5,000-\$9,999; \$10,000-\$19,999; \$20,000-\$100,000 by
161 increments of \$20,000; amounts above \$100,000 by increments of \$50,000, a statement that a
162 value cannot readily be determined, or a statement that the value cannot be disclosed (e.g.,
163 confidentiality agreement with entity). Only support that is an appropriate fee for service and not
164 another type of support or gift should be counted as support paid for research, otherwise the
165 value should be reported as not for research.

166 **D. Managing Financial Disclosures**

167
168 Ultimately, it is the responsibility of JCHR and the investigator’s institution, if the institution has
169 a FCOI policy conformant to 42 CFR 50 Subpart F, to manage financial interests; however
170 PEDIG Network has developed a policy to avoid FCOI within the Network.

171 **1. Policy to Avoid Financial Conflict of Interest**

172 The PEDIG Network policy on avoiding FCOI within the Network relates to non-
173 research SFI paid directly to the investigator or to the investigator’s institution/legal

Policy Appendix I: PEDIG Financial Disclosure Policies

Version 1.0, February 20, 2020

174 entity on the investigator's behalf in which the investigator has equity. The Operations
175 Committee reserves the right to assess all disclosures as to whether a potential FCOI
176 exists. The Operations Committee also reserves the right to confirm for each protocol if
177 this policy is appropriate. The PEDIG policy on avoiding FCOI within the group requires
178 disclosure of any SFI paid directly to the investigator (or to the investigator's spouse or
179 dependent children) or institution/legal entity on the investigator's behalf in which the
180 investigator has equity. The definition of an SFI is defined in Section B2 above whose
181 value exceeds \$5,000.

182

183 The following describes PEDIG's policy to avoid any potential bias due to any FCOI within the
184 group:

- 185 • Investigators with a non-research SFI with an entity related to PEDIG research are
186 presumptively prohibited from enrolling participants into an applicable PEDIG study that
187 involves more than minimal risk.
- 188 • Investigators with a non-research SFI with an entity related to PEDIG research are
189 presumptively prohibited from enrolling more than 10% of the study participants in any
190 applicable PEDIG study.
- 191 • The Director of the PEDIG Coordinating Center and the Network Chair are
192 presumptively prohibited from having a non-research SFI with an entity related to PEDIG
193 research.
- 194 • Members of the Operations Committee are presumptively prohibited from having a non-
195 research SFI with an entity related to PEDIG research.
- 196 • No more than 50% of the members of any protocol development committee, or any
197 writing committee should have a non-research SFI with an entity related to the work
198 being conducted for the specific PEDIG research.
- 199 • Members of the Data and Safety Monitoring Committee are presumptively prohibited
200 from having a non-research SFI with an entity related to PEDIG research for which the
201 DSMC is monitoring.

202

203 The determination of whether a FCOI exists in certain instances can be a matter of judgment
204 involving all the facts of the situation. The Network Chair/s and Director of the Coordinating
205 Center will oversee review of potential FCOI. If the investigator disagrees with the management
206 plan proposed by the Network Chair/s and Coordinating Center Director, the investigator can
207 make an appeal to the Executive Committee, which will delegate review of the disclosure to a
208 sub-Committee of the Executive Committee. When necessary the sub-Committee will provide
209 final decisions on behalf of the Network.

210

211 **2. Investigator Options When a Presumptive Prohibition is Identified to Avoid a FCOI**

212 If a presumptive prohibition is identified, to avoid a FCOI, the following are examples on how
213 unique instances might be managed.

- 214 • Preclude participation in the design or reporting of the study

Policy Appendix I: PEDIG Financial Disclosure Policies

Version 1.0, February 20, 2020

- 215 • Divestiture – allow arrangements to go forward contingent upon the sale or disposal of
216 specified financial interests to eliminate or reduce the financial conflict of interest by a
217 certain date
- 218 • Severance of relationships that heighten or create actual or potential conflicts –
219 investigators may be required, as example, to relinquish a seat on a board of directors or
220 terminate a consulting arrangement with an outside entity to reduce the financial or
221 fiduciary conflict of interest

222
223 The Network Chair/ and Coordinating Center Director, or the Executive Committee members
224 (when cases are overseen by the Executive Committee) may recommend other conditions or
225 restrictions on the proposed arrangements if such conditions or restrictions will contribute to the
226 elimination, reduction, or management of the conflict of FCOI.

227
228 If an IRB determines that an FCOI exists, a management plan may be required.

229 230 231 **E. Additional Requirements for Investigators Covered Under JCHR Financial Conflict of** 232 **Interest Policy**

233 Investigators covered under the JCHR financial conflict of interest policy must abide by this
234 PEDIG Network policy as well as the JCHR policy (see policy
235 <http://publicfiles.jaeb.org/jaeb/ConflictOfInterest.pdf>)

236
237 The following additional requirements are required for investigators covered under JCHR policy:

238 239 **1. Travel Reporting**

240 Investigators must disclose the occurrence of any reimbursed or sponsored travel (*i.e.*, that which
241 is paid on behalf of the Investigator and not reimbursed to the Investigator so that the exact
242 monetary value may not be readily available), not reimbursed directly by JCHR, whether related
243 to their institutional responsibilities or not (e.g., travel related to consulting performed while the
244 investigator has taken annual leave time must be reported); however, this disclosure requirement
245 does not apply to travel that is reimbursed or sponsored by:

- 246 • a Federal, state, or local government agency,
- 247 • an Institution of higher education as defined at 20 U.S.C. 1001(a),
- 248 • an academic teaching hospital,
- 249 • a medical center, or
- 250 • a research institute that is affiliated with an Institution of higher education.

251
252 The JCHR FCOI policy requires that the investigator disclose the following for travel reporting:
253 purpose of the trip, the identity of the sponsor/organizer, the travel destination and the duration
254 of the trip. In accordance with the JCHR FCOI policy, the institutional official will determine if
255 further information is needed, including a determination or disclosure of monetary value, to
256 determine whether the travel constitutes an FCOI with the investigator's research.

257
258 The disclosure must be reported within 30 days of travel.

Policy Appendix II: PEDIG Industry Collaboration Policies

Version 1.1, February 20, 2020

1 The Pediatric Eye Disease Investigator Group (PEDIG) is a collaborative network dedicated to
2 facilitating multicenter clinical research in strabismus, amblyopia, and other eye disorders that
3 affect primarily children. PEDIG is committed to collaborating with companies in a manner that
4 appreciates the needs of industry with regard to drug or device development while maintaining
5 rigorous clinical trial design and implementation, and investigational ethics, consistent with
6 academic standards.

7
8 The sections below outline the PEDIG guidelines with regard to collaboration with a company
9 (subsequently referred to as the Company). Depending on the type of collaboration, some of the
10 guidelines below may not apply, while others might need to be developed.

11 12 **A. Protocol Development**

- 13 1. In collaboration with the Company, PEDIG will develop the protocol according to PEDIG
14 Network standards (including associated procedures, CRFs, statistical plan, etc.).
- 15
16 2. PEDIG will accommodate Company needs required for drug or device registration as long as
17 they are feasible and clinical trial design and implementation consistent with academic
18 standards is maintained.
- 19
20 3. If requested by the Company, PEDIG will consider expanding protocols with additional
21 Company support to provide adequate size such that the Company can analyze data as two or
22 more definitive trials according to FDA guidance.
- 23
24 4. The PEDIG Executive Committee will need to approve the protocol design and implementation
25 plan.
- 26
27 5. The protocol will be placed in the public domain at the start of the study. The protocol will be
28 posted on the PEDIG public website and summarized on public websites such as
29 clinicaltrials.gov.

30 31 **B. Study Data**

- 32 1. PEDIG will have ownership or co-ownership of the study data.
- 33
34 2. The final dataset will be placed in the public domain.
- 35
36 3. At the completion of the study, PEDIG will distribute a final dataset to the Company for its
37 needs regarding FDA submission (as a general rule, PEDIG does not intend to prepare FDA
38 submissions itself) and its internal use. The dataset may not be used for any other purpose
39 unless approved by PEDIG in writing.

40 41 **C. Publications, Presentations, and Publicity**

- 42 1. PEDIG is free to publish and present the study data without restriction.
- 43
44 2. PEDIG will provide the Company with the opportunity to review and comment on the primary
45 manuscript and any secondary manuscript that provides information related specifically to the
46 treatment under study that is not already in the public domain. This policy also applies to
47 abstracts and presentations that are made prior to the information having already been publicly

Policy Appendix II: PEDIG Industry Collaboration Policies

Version 1.1, February 20, 2020

48 disseminated. Unless PEDIG and the Company agree on different time intervals, the Company
49 will be given 14 days to comment on manuscripts and abstracts and up to an additional 30 days
50 if there is a need for the Company to submit patent application materials to obtain patent
51 protection.
52

53 3. PEDIG will have the opportunity to review and must approve all press releases of the Company
54 related to the study prior to their release.
55

56 4. The Company may not publish, present, or otherwise release any study results or information
57 about the study that have not already been publicly disseminated by PEDIG.
58

59 **D. Data Integrity**

60 1. The PEDIG Coordinating Center will oversee data collection, data cleaning, data lock, data
61 maintenance, etc. PEDIG utilizes electronic data capture as the source documentation for most
62 data. PEDIG will provide the Company with details of these procedures for the Company to
63 verify that these procedures meet regulatory requirements.
64

65 2. The Company may conduct a yearly site visit of the PEDIG Coordinating Center to evaluate
66 database maintenance and other Coordinating Center procedures as they pertain to meeting
67 regulatory requirements.
68

69 **E. Clinical Sites**

70 1. With input from the Company, PEDIG will select the participating sites.
71

72 2. PEDIG will establish the procedures for site certification and be responsible for certification of
73 the sites. Certification includes the review and approval of regulatory documents such that the
74 clinical site is approved to receive investigational product and subsequently enroll patients. The
75 Company may review these procedures to verify that they are in accord with regulatory
76 requirements.
77

78 **F. Site Monitoring**

79 1. PEDIG will determine the monitoring needs it deems critical for the study and provide the
80 support needed for such monitoring. The Company may review the PEDIG site-monitoring
81 plan to verify that it meets regulatory requirements.
82

83 2. If the Company determines that additional monitoring is needed for regulatory purposes, PEDIG
84 will consider this request but will have the right to reject the request. Support for any additional
85 monitoring will be provided by the Company.
86

87 3. Site monitoring will be overseen by the PEDIG Coordinating Center, which will have the option
88 of conducting this monitoring itself.
89

90 4. The Company will not be permitted to contact the clinical sites, request data, or conduct
91 monitoring visits without approval from PEDIG. Permission may be granted in the event of a
92 pending FDA audit.
93

Policy Appendix II: PEDIG Industry Collaboration Policies

Version 1.1, February 20, 2020

94 **G. Adverse Event Reporting**

- 95 1. PEDIG will establish a system for adverse event reporting, review, and coding. The Company
96 may review this plan to verify that it is in accord with regulatory requirements and will meet the
97 Company's needs for its FDA submission.
98

99 **H. Efficacy and Safety Reviews, and Stopping Decisions**

- 100 1. PEDIG will be responsible for developing the statistical analysis plan. The Company may
101 review this plan to verify that it is in accord with regulatory requirements and will meet the
102 Company's needs for its FDA submission.
103
104 2. An independent Data and Safety Monitoring Committee (DSMC) will review all data as
105 appropriate and make recommendations to PEDIG regarding protocol modifications and
106 stopping a study for efficacy or safety. The Company will not be provided with the study data
107 until either the end of the study or the DSMC's decision that such data can be provided.
108
109 3. PEDIG will provide the Company with monitoring reports related to study progress (e.g.,
110 recruitment, protocol deviations, and retention reports).
111

112 **I. Investigational Product**

- 113 1. The Company will be responsible for providing the investigational product, placebos (when
114 applicable), packaging of the investigational product, and all necessary manufacturing
115 information for preparation of the IND or IDE and any related materials. The Company will
116 agree to provide the investigational product and related materials for the duration of the study.
117
118 2. Investigational drug will be manufactured in accordance with Good Laboratory Practice (GLP)
119 and Good Manufacturing Practice (GMP) standards. Investigational devices will be
120 manufactured in accordance with GMP standards.
121
122 3. PEDIG will develop procedures for supplying the investigational product to the clinical sites,
123 maintaining accountability of the investigational product at the site, and disposal or return of the
124 investigational product. The Company will pay for the costs of a pharmacy to store and ship the
125 investigational product, supplying investigational product to the clinical sites and returning
126 investigational product for disposal, if required. At the Company's request, PEDIG will
127 consider allowing the Company to supply the investigational product and related materials
128 directly to the clinical sites.
129
130 4. For device studies, the Company will provide technical support for the duration of the study.
131

132 **J. Laboratory Measurements**

- 133 1. In collaboration with the Company, PEDIG will determine those laboratory measures it deems
134 necessary for the study and the selection of a central laboratory.
135
136 2. The Company may identify additional laboratory measures required for regulatory or other
137 purposes. PEDIG will attempt to accommodate these needs as long as they do not adversely
138 affect the conduct, data validity, or safety of the study.
139

Policy Appendix II: PEDIG Industry Collaboration Policies

Version 1.1, February 20, 2020

140 **K. FDA Registration and Submission**

- 141 1. PEDIG will hold the IND or IDE for the study, unless agreed upon otherwise with the
142 Company.
- 143
- 144 2. The Company will be responsible for performing registration and submission-specific analyses
145 and preparation as needed.
- 146
- 147 3. Should there be a need to conduct a second trial specifically for the purpose of the FDA
148 submission, the Company will have the option of conducting the second trial independently
149 from PEDIG or the Company may contract with PEDIG to conduct the second trial as long as
150 PEDIG agrees that such a trial is an appropriate use of PEDIG resources at that time.

151

152 **L. PEDIG Policies**

- 153 1. The Company will be provided with a copy of PEDIG policies and the Terms and Conditions of
154 the NEI Cooperative Agreement.

155

156 **M. Study Committees and Oversight**

- 157 1. The Company may appoint an individual to serve as the Company liaison to PEDIG.
- 158
- 159 2. The Company liaison will receive monitoring reports on the progress of the study.

160

161 **N. Legal Agreements**

- 162 1. A legal agreement will be established between the Company and the Jaeb Center. The legal
163 agreement will contain an indemnification section that specifies the situations in which the
164 Company will provide indemnification, a confidentiality section agreeable to both parties, and
165 an intellectual property section agreeable to both parties.
- 166
- 167 2. A legal agreement will be established between the Jaeb Center and each participating site for the
168 site's participation in the study.

169

170 **O. Cost Sharing**

- 171 1. PEDIG through its NIH grant may provide funding for studies that are associated with:
 - 172 • one definitive efficacy trial per specific intervention that meets PEDIG standards
 - 173 • earlier stage trials (e.g., dose ranging) or other trial designs as deemed appropriate by
174 PEDIG
- 175
- 176 2. When study costs are shared between PEDIG and the Company, PEDIG typically will cover the
177 costs of the Coordinating Center and other infrastructure costs (except for those explicitly
178 excluded in #3 and #4 below).
- 179
- 180 3. PEDIG will usually not support clinical trial costs that are:
 - 181 • Not necessary for optimal academic clinical trial design and implementation (e.g., additional
182 monitoring, special laboratory analyses, etc.)
 - 183 • Associated with additional patient numbers required by the Company (e.g., to have enough
184 power to analyze data as two definitive trials according to FDA guidance) or to conduct a
185 second parallel trial.

Policy Appendix II: PEDIG Industry Collaboration Policies

Version 1.1, February 20, 2020

- 186 4. In general, the Company will be expected to provide funding for:
187 • All costs for the clinical sites to conduct the protocol, through a subcontract with the Jaeb
188 Center, including IRB costs
189 • All costs involved with the manufacture, labeling, distribution, and disposal of
190 investigational product and any other related costs associated with the intervention
191 • All costs associated with image grading or other protocol-approved analyses (e.g.,
192 pathology, genetic, pharmacokinetic)
193 • All laboratory costs
194 • Site monitoring costs for site visits and other activities over and above what PEDIG would
195 be typically performing
196 • All costs involved related to FDA and other regulatory agencies
197 • All costs involved for pharmacokinetic study or other preclinical or ancillary studies
198 mutually agreed upon by PEDIG and the Company
199
