

# Tame Your Fragmented Data with QuikFynd's Enterprise QuikSearch

## IMPROVE PRODUCTIVITY AND INCREASE COLLABORATION BY ENABLING YOUR WORKFORCE TO QUICKLY FIND THE RIGHT INFORMATION

According to Forrester Research Workforce Survey in 2016, 54% of those surveyed say that their work gets interrupted because they cannot find or get access to information that is essential to completing their tasks.

You have valuable data in your company and the quantity of this data is growing minute by minute, which is going to exacerbate this situation. As your company adopts cloud solutions, your data is now in cloud drives, in addition to your company servers and desktops, making them extremely difficult (if not impossible) to quickly locate and manage.

QuikFynd's **QUIKSEARCH** enables instantly finding files on your desktop, network, and across multiple cloud drives (Google Drive, Box, DropBox, OneDrive, Amazon) with just a few keystrokes. QuikFynd also helps you navigate through all your enterprise data with more information about each file like (i.e.: legal doc, tech, travel doc, picture of a computer, person, automobile, etc. You can greatly improve productivity for your enterprise by enabling your workforce to find the relevant and needed information faster from all your data sources and access it securely.

### **QuikFynd Benefits:**

- ✓ **QUIKSEARCH** ACROSS MULTIPLE DATA STORES (DESKTOP, CLOUD, NAS)
- ✓ **QUIKTAG**: AUTOMATED FILE TAGGING WITH MACHINE LEARNING

# Quikfynd Product Versions and Features

## FEATURES

	Desktop	Storage	Enterprise
<b>DATA PRIVACY</b> Your data and the search index always remain on your own device, so you know that your data is not subject to any privacy concerns.	✓	✓	✓
<b>AUTO ORGANIZATION</b> QuikFynd automatically organizes your data into common categories such as Images, Documents, Music so you have instant access to your data without browsing through folders.	✓	✓	✓
★ <b>FULL FEATURED SEARCH WITH RESULTS HIGHLIGHTING</b> You can easily find you files by just typing a keyword and QuikFynd will search for file names, folder names, meta tags and content in your files for the matching keyword. QuikFynd even highlights matching text, so that you can open the right document the very first time.	✓	✓	✓
<b>AUTOSUGGEST</b> With just one keystroke, QuikFynd will suggest words that are present in your content so that you don't have to remember full word or its spelling.	✓	✓	✓
★ <b>CLOUD SEARCH</b> Now you can connect multiple cloud storage accounts to your NAS based search server. Your data stays in the respective cloud drives, but you can still perform powerful search across NAS and all cloud drives. Cloud Drives include Google Drive, Box, Dropbox, OneDrive, & Amazon.	✓	✓	✓
★ <b>LOCATION SEARCH</b> QuikFynd translates GPS information from your images to friendly location based information so that you just say "Paris" and we find pictures from your Paris dream vacation.	✓	✓	✓
<b>DUPLICATE DETECTION</b> If you have same copy of your file across your storage devices and even across multiple cloud drives,	✓	✓	✓
<b>COLLECTIONS FOR QUICK SHARING</b> With QuikFynd you can select any number of items across your local and cloud storage accounts and create a shared link that can be password protected and have policy controls to automatically expire so that you can share securely.	✓	✓	✓
<b>BROWSER ACCESS</b> When using a computer, you can use QuikFynd Web interface from your browser to search and access files on your NAS.		✓	✓
<b>NAS SEARCH</b> Search content on your NAS with support for popular NAS models		✓	✓
★ <b>AUTO TEXT TAGGING</b> QuikFynd's <b>QUIKTAG</b> can identify if your document is a technology article or related to business. It can identify names of people and organizations or locations in documents and tag them automatically.			✓
★ <b>DETECT OBJECTS IN IMAGES</b> QuikFynd's intelligent AI based algorithms can identify common objects in your pictures so you can now easily find the right image (i.e.: a picture of a computer, car, person, tables, etc.).			✓
★ <b>SEARCH SCANNED DOCUMENTS AND IMAGES</b> QuikFynd will search meta tags and content in your scanned files & images for the matching keyword. QuikFynd highlights matching text, so that you can quickly open the right document.			✓
<b>FIND SIMILAR CONTENT</b> QuikFynd's algorithms can find images or text documents that are "similar to" the one you just found, so that you can discover other relevant content from all the files you have in your storage.			✓
<b>MULTIPLE USERS &amp; PERMISSIONS</b> Create multiple users and provide separate password for each user to control access to your search index			✓
