Technical Experienced with HTML5, CSS, Javascript, PHP, MySQL, Ruby, Ruby on Rails, ActionScript, Java, C#, and .NET. Comfortable with Windows and Linux environments. Familiar with the Git version control system.

Experience **QuantumYeti** www.quantumyeti.com *2012 - current*

Sole-proprietorship I founded to offer web development services to my clients. Also functions as an online portfolio and blog, with a custom S3-integrated CMS.

Circus of Screams www.circusofscreams.net *2013*

Haunted house in Oregon that has donated over \$90,000 and 25,000 pounds of food to local charities. Site features an administration panel custom-tailored to the owner's needs, making annual updates simple and time efficient.

Beth Haven Church www.bethhavenchurch.com *2012*

Local church founded in 1960. Site has an administration panel, facilitating the management of announcements, events, photos, and audio. Uses Amazon S3 for asset storage.

Monkey Wrench Clothing www.monkeywrenchclothing.com *2007*

Clothing store located in Kansas City. Site features a custom-built ecommerce solution, complete with product, gift card, and order management interfaces. Integrated with Amazon S3, and the PayPal and Stripe payment gateways.

R.L. Graham Associates www.rlgraham.tv *2006*

Manufacturers' representative to the physical security market. Site features a file upload tool that facilitates the sharing of files and documents between R.L. Graham Associates and their customers.
