

Captivating the User Experience

A Cloud Managed Unified Platform for Essential Wi-Fi Services and Monetization

CaptiveXS introduces AAA with cloud-based RADIUS authentication and authorization to enable seamless guest Wi-Fi deployment.

- ▶ External captive portal supported with major Wi-Fi vendors and current support includes - Aruba, Ruckus and Cisco Meraki, etc.
- ▶ Enable cloud based captive portal solution without the need of any on-premise equipment.
- ▶ The solution can be implemented with a simple configuration on the radius enabled network equipment such as AP or Controller.
- ▶ The solution only needs to be in control plane and it removes any performance concerns under normal course of traffic.
- ▶ The Captive Portal features are configured through the cloud managed dashboard and the settings become affective in real-time. All of the user analytics are available on the dashboard in real-time as well.

Clients can always use the on-premise solution to enable advance IOT and security features

- 1 IoT Discovery, Management & Security
- 2 Smart Captive Portal with Social Login
- 3 Monetization/Engagement through
- 4 Content Insertion
- 5 Web Security - Content Filtering
- 6 Deep User Analytics
- 7 RaGaPa-Pi or VM Deployment
- 8 Simplified Cloud Management
