PSMA RLT: What You Need to Know!

a virtual two-part program

Tuesday, January 31, 2023, 5:30 - 7:30pm EST

This two part series of talks devoted to PSMA RLT will provide a brief overview of the current treatment landscape of metastatic prostate cancer including a discussion of the role for PSMA PET in advanced prostate cancer and tips for identifying patients most likely to benefit from PSMA targeted RLT. It will also provide a detailed overview of the steps needed to get PSMA RLT implemented at your institution including tips for patient flow, RLT dosing and post-therapy imaging.

Part I:
Integration of PSMA Theranostics into Advanced Prostate Cancer Therapy: A Personal Perspective
January 31, 2023, 5:30 pm EST
